

Answers For Employee Rights And Responsibilities Workbook

This book analyses corporate rescue laws, processes and policies prescribed in corporate insolvency or bankruptcy laws, and employment laws of the UK and the US, with a particular focus on how extant employee rights are treated when a debtor employer initiates corporate insolvency proceedings. The commencement of formal insolvency proceedings by an employer affects employees' rights and interests. Employment laws seek to protect employees' rights and interests, while insolvency laws seek to promote corporate rescue, which may entail workforce changes. Consequently, this creates a tension between whose interest insolvency law should give primacy of protection. The book analyses how corporate rescue processes such as administration, pre-pack business sales, company voluntary arrangements, receivership and liquidation impact employee rights and protection during corporate rescue proceedings in both jurisdictions. It goes on to address how the federal system of government in the US and the diffusion of power between federal and state law jurisdictions impact a uniform code of employee protection during Chapter 11 bankruptcy reorganisation proceedings. The book considers how an interpretative approach to law (Dworkin's Interpretative Theory of Law) may be used to balance both employee protection and corporate rescue laws during corporate insolvency in the UK and the US. Of interest to academics, students and employment law practitioners, this book examines the tension between corporate rescue laws and employment protection laws during corporate insolvency in the US and the UK and how this tension may be remedied or balanced.

quandary, they may remember the core principles discussed throughout this book and recognize the need to seek qualified legal advice. The law affects everything responders do in their daily activity, especially when functioning as an agent of a fire or EMS department. Fire fighters are calculated risk takers. They risk a lot to save a lot, and conversely risk nothing to save nothing, and they often find themselves operating within the gray area of those two extremes. Having an understanding of the law as it applies in different situations allows the prudent fire fighter, EMT, supervisor, manager or officer to manage legal exposure. There are times when it may be necessary to assume greater legal risk because it is the right thing to do. There are other times when a legal risk is not worth any potential benefit. As a result, it is important for those in fire and EMS disciplines to have a passing knowledge of the law and how it affects them in their profession"--
