The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. Times are changing and the labor markets are under immense burden from the collective effects of various megatrends.

Technological growth and grander incorporation of economies along with global supply chains have been an advantage for several workers armed with high skills and in growing occupations. However, it is a challenge for workers with low or obsolete skills in diminishing zones of employment. Business models that are digitalized hire workers as self-employed instead of standard employees. People seem to be working and living longer, but they experience many job changes and the peril of skills desuetude. Inequalities in both quality of job and earnings have increased in several countries. The depth and pace of digital transformation will probably be shocking. Industrial robots have already stepped in and artificial intelligence is making its advance too.

Globalization and technological change predict the great potential for additional developments in labor market performance. But people should be ready for change. A progression of creative annihilation is probably under way, where some chores are either offshored or given to robots. A better world of for jobs cannot be warranted – a lot will be contingent on devising the right policies and institutes in place.

This paper discusses the background to, possible contexts of, and likely difficulties with, an eventual Central American peace accord particularly its verification. It begins with a brief analysis of the political, military and diplomatic background of the regional crisis, setting the scene for a look at the verification aspects of the peace negotiations and agreements to date: Contadora, Esquipulas II, and Sapo . It shows what kind of further agreement one might see in the future, doing this by examining both "minimum" and "maximum" content possibilities. This is followed by a discussion of the verification implications of such agreements and the political, geographical, social, and technical difficulties they might pose.

"The Corona crisis and the Need for a Great Reset" is a guide for anyone who wants to understand how COVID-19 disrupted our social and economic systems, and what changes will be needed to create a more inclusive, resilient and sustainable world going forward. Thierry Malleret, founder of the Monthly Barometer, and Klaus Schwab, founder and executive Chairman of the World Economic Forum, explore what the root causes of these crisis were, and why they lead to a need for a Great Reset. Theirs is a worrying, yet hopeful analysis. COVID-19 has created a great disruptive reset of our global social, economic, and political systems. But the power of human beings lies in being foresighted and having the ingenuity, at least to a certain extent, to take their destiny into their hands and to plan for a better future. This volume is the first complete English translation and annotated study of Bartolomé de Las Casas's important and provocative 1552 treatise commonly known as the Confesionario or Avisos y reglas. A text that generated controversy, like Las Casas's more famous Brevísima relación, the Confesionario outlined a strikingly novel and arguably harsh use of confession for those administering the sacrament to conquistadores, encomenderos, slaveholders, settlers, and others who had harmed the indigenous people, thus using magisterial authority and jurisdictional power to promote restitution. David Orique addresses how, from 1516 to 1547, Las Casas subscribed to and wrote about the theory and practice of the doctrine of restitution. He then presents the specific

historical context of the development of the initial manuscript of the Confesionario in 1547 as Doce reglas (Twelve Rules), which later became the augmented Confesionario manuscript. Orique's commentary on the 1552 Confesionario treatise highlights how Las Casas's Argumento, and its approval by theologians, legitimates his work. Orique outlines the various guidelines proposed to confessors to identify, investigate, and seek restitution from offending Spaniards based on their possessions and circumstances. He also explores Las Casas's use of the Thomistic tripartite scheme of divine, natural, and human law. With insightful analysis and commentary accompanied by an eminently readable translation, *To Heaven or to Hell* will be especially useful to students and scholars of Latin American colonial history, early modern religion, and Catholic studies.
