The patterns in this book are the documentation of having gone through that experience, giving those that dare push the envelope a head start at success.”—David E. DeLano, IBM Pervasive Computing “If you have ever wondered how you could possibly foster any cultural changes in your organization, in this book you will find a lot of concrete advice for doing so. The application of theory to practice in addressing social transformation still has a lot of room for growth and improvement. This is also true of theory being informed by practice. Too often, there are gaps between what is studied in the academy and what is needed in the field. The academy develops theories in isolation from the everyday lives of people, especially in post-conflict environments. Communities seeking innovative ways to address their social needs can benefit from the learning of theories and research conducted within academia. At the same time, these methods need to be relevant to the local contexts within which they are being used. While there are certain norms of communication in the academy of how research is conducted and disseminated, there needs to be a translation into practical terms to be used in the field. *Redefining Theory and Practice to Guide Social Transformation: Emerging Research and Opportunities* addresses the need practitioners and social change agents have in finding processes and practices to use in the field to engage with and transform communities. This critical reference book provides an innovative fieldwork method that leads to social transformation and suggests ways to further develop the relationship between academic theories and practices around social conflicts with the existing local knowledge. The chapters include mini case studies that have been developed over the years from the authors' work with youth and community leaders with the objective of providing a methodology that allows practitioners to approach the field by engaging with local actors in ways that are generative and trustworthy, yet rigorous. While highlighting the practices, notions, and technologies that are at work in conflict, post-conflict, or transitioning out of conflict settings by local community leaders, this book is ideally for practitioners in the field of conflict, peacebuilding, and social and conflict transformation; community leaders and social organizers; as well as practitioners, stakeholders, researchers, academicians, and students interested in social transformation.

Gain insight into history organizations of all shapes and sizes in this book, which addresses the opportunities and challenges of public historians' work through the prism of the past, present, and future of our communities and institutions, as well as the public history field itself. Featuring essays from some of the leading thinkers in the profession, this book not only looks at major themes as they relate to historians' work but also inspires creativity in how they approach their work in an institutional and personal sense. The themes themselves are important, but even more important are the articles (presented here as chapters) that amplify the overarching themes. Chapters discuss in-depth and through real-world examples, the work of history organizations. They specifically focus on the challenges and opportunities that are important to any nonprofit (or small business)—entrepreneurship, change, transformation, possibility/opportunity, partnerships—but also those unique to history organizations, leverage the asset of history to: explore place, commemorate the past (and therefore better understand the present), demonstrate how it is people who make history, and discern how to use the past to chart the future. Together, *An American Association for State and Local History Guide to Making Public History* provides a roadmap of the national discussions the field of history museums and organizations is having regarding its present and the future.
