productivity. This
book covers effective
ways to develop
robust applications in
Java using Spring.

The course is up made
of three modules, each
one having a take-

first module takes the
approach of learning
Spring frameworks by
building

applications. You will
learn to build APIs
and integrate them
with popular

Spring architecture
using Project Reactor.
In the second module,
after getting hands-on
with Spring, you will
learn about the most
popular tool in the

Each topic is

invited to think about
each topic; to take it
