Exam Board: AQA Level: AS/A-level Subject: Psychology First Teaching: September 2015 First Exam: June 2017 AQA Approved 'Clear, well laid out and student friendly and I'm confident my students will be well prepared. The real life examples and practise questions are much appreciated'. Ian Thomson, Larne Grammar School. Equip your students with the knowledge and the skills that they need for the new AQA Psychology A-level, with guidance on assessment objectives, clear, comprehensive coverage and activities that consolidate understanding, develop key skills and ensure progression. - Thoroughly engage your students with Psychology at A-level through extensive real-life contemporary research - Ensure students learn and understand content for all the key topics with the clear, accessible style from Jean-Marc Lawton and Eleanor Willard - Helps your students understand the assessment objectives and develop their examination skills with assessment guidance and checks throughout and practice questions - Ensures progression and encourages independent thinking with extension suggestions and activities

The Extending Knowledge and Skills series is a fresh approach to A Level Psychology, designed for greater demands of the new AQA specification and assessment, and especially written to stretch and challenge students aiming for higher grades. Dealing with the top of AQA's Paper 3: Relationships, this book is deliberately laid out with the assessment objectives in mind, from AO1: Knowledge and Understanding material, followed by AO2: Application material, to AO3: Evaluation and analysis material. Providing the most in-depth, accessible coverage available of individual topics in Paper 3, the text is packed full of pedagogical features, including: Question Time features to ensure that the reader is consistently challenged throughout the book. New research sections clearly distinct within each chapter to ensure readers have access to the most cutting-edge material. A clear focus on the assessment objectives for the paper topic to ensure readers know when and where to apply knowledge. The use of example answers with examiner-style comments to provide greater insight into how to/how not to answer exam questions. An engaging, relevant and challenging text which broadens student understanding beyond that of the average textbook, this is the essential companion for any student taking the AQA A Level Paper 3 in Psychology.

From the moment the starting gun is fired on Kona's sandy beach at the Ironman World Championship, triathletes have 17 hours to cross the finish line. It's a feat marking the ultimate achievement in the sport. "17 Hours to Glory" is one of only a few books to commemorate this dramatic quest. Seventeen compelling stories allow readers to experience the competition first-hand, revealing tremendous athleticism, unbelievable capacity for suffering, and true strength of character. The personal stories of triathlon's most epic characters come to life in this book, beginning with the famous story of Julie Moss's determination to reach the finish line, paving the way for future champions like Mark Allen and Paula Newby-Fraser, and a new generation of superstars in Greg Welch and Chrissie Wellington. "17 Hours to Glory" tells the stories of a sedentary secretary with all of the wrong habits taking up triathlon to lose weight, a nun who races triathlons to bring attention to her causes, and two men with a rivalry so intense that their disabilities fade into the shadows. Injury, tough breaks, and down-to-the-wire finishes highlight years of dedication to reaching a goal. Some will become champions, some will overcome all odds just to finish, only to come back and do it again. Triathlon's most dynamic heroes are candidly portrayed in "17 Hours to Glory," a book that puts no limits on the possibilities of the human spirit.

Ensures your students master the core studies and research methods for OCR Psychology with a clear, organised approach; activities, research practicals and practice questions develop the skills required at AS and A Level - Supports you and your students through the new OCR A Level specification, with an author team experienced in teaching and examining OCR Psychology - Helps students easily navigate the core studies and associated themes and perspectives with an organised, accessible approach - Ensures your students develop strong research skills, with research practicals and thorough coverage of the content needed for the Research methods paper - Develops the critical thinking, mathematical and problem-solving skills required for the study of Psychology through a wealth of targeted activities - Strengthens students' learning and progression with practice questions and extension activities

The exam books have been carefully written using student friendly language and a layout you will find easy to understand. Each topic has been broke down into EXAM NOTES which are more concise than general psychology text books but more comprehensive than standard revision guides. These books have been specially developed and written by experienced teachers and examiners to help students achieve the best possible grade in their psychology exam. ü Reduce frustration - All exam notes are presented in an easy way for you to learn ü Prevent nail biting - No more " I don ' t get this! " Key theories and studies are written in an easy peasy friendly way. ü Prevent Hair loss - Don ' t pull your hair out over the evaluation part. We have written it all for you! ü Reduce panic attacks - We have given you lots of exam questions at the end of the exam notes to practise (to prevent shock in the real exam if you haven ' t seen any before!). ü Prevent confusion - Use the revision checklist as you study to tell you what and how much you need to know. Visit www.psychologyzone.co.uk the only dedicated A Level Psychology website which has over 1000 exam questions and model answers, exam notes, exam advice and much more. Register onto the website and use the examGenerator tool. You can search for exam style questions with model answers or mark schemes and create your own revision or mock paper.

Three sets of ocean liners, each destined to be of three vessels, dominated the Atlantic in the Edwardian era. The race to build the biggest and the best began with Mauretania and Lusitania in 1906, followed by the White Star Line's Olympic and Titanic in 1911-12. Each of these pairs was to see a larger sister, developed as a result of changes needed or desired as a result of operating the two earlier vessels, with Cunard's being Aquitania and White Star's, the ill-fated Britannic. Germany's answer to these British behemoths was the Albert-Ballin designed trio of Imperator, Vaterland and Bismarck. Through misfortune or war, two of these vessels would sink but the others led useful lives, with Aquitania surviving two world wars before being scrapped. Designed to be the absolute engineering achievements of their time, these nine vessels dominated the Atlantic. J. Kent Layton tells the story of the Edwardian Superliners in this fabulously illustrated volume, showcasing many images previously unpublished and never before seen. Rarely can one describe a book as definitive, but this volume truly deserves the accolade.

Student Unit Guides are perfect for revision. Each guide is written by an examiner and explains the unit requirements,

summarises the relevant unit content and includes a series of specimen questions and answers. A Content Guidance section combines an overview of the specific unit or module and the key terms and concepts, with an examiner's interpretation so that students understand precisely what they need to understand and learn, the skills required and the potential pitfalls. A Question and Answer section provides graded answers, typically A and C, to questions which have been set to reflect the style of the unit. All responses are accompanied by commentaries which highlight their respective strengths and weaknesses, giving students an insight into the mind of the examiner.

AQA(A) A2 Psychology Student Unit Guide New Edition: Unit 3 Biological Rhythms and Sleep, Relationships, Aggression and Cognition and Development

Written by a senior examiner, Jean-Marc Lawton, this AQA(A) A2 Psychology Student Unit Guide is the essential study companion for Unit 4: Psychopathology. This full-colour book includes all you need to know to prepare for your unit exam: clear guidance on the content of the unit, with topic summaries, knowledge check questions and a quick-reference index examiner's advice throughout, so you will know what to expect in the exam and will be able to demonstrate the skills required exam-style questions, with graded student responses, so you can see clearly what is required to get a better grade meets 2012 specification changes

This book provides simple, clear, in-depth explanations of all the topics in the AQA GCSE specification 4180 syllabus but it will prove invaluable to students at many levels on many courses and to the independent reader. It can be used as a stand-alone home study course, as a classroom text, as a reference text or just for pleasure for those who love to think about what makes people tick. Psychology describes up-to-date research as well as some classic psychology studies and even debunks one or two psychology research myths. It leads the reader through all the topics in the syllabus as a teacher would in a classroom setting. Topics are presented as a series of lessons followed by "Check Your Understanding" sections, which are designed to help you check and retain the information in each lesson. An assessment record provided at the end of the book will help you keep track of your progress. Lessons are interactive with many opportunities to jot down your thoughts and reactions, reflect on how a topic relates to your own experience, discuss with other people and become more involved with the material presented. Students can pinpoint the topics they are studying for GCSE by using the table mapping the GCSE specification against the lessons in this book. For those studying outside formal classrooms there are guidelines about how best to approach your studies. The book assumes that readers have no previous knowledge of psychology and among the topics covered are: *á* Conformity and Obedience - would you press a button to kill someone just because you are told to do so? Many people would, it seems. *á* Sex and Gender - do girls and boys, men and women behave so differently? If so, why? *á* Memory - how does memory work and how accurate is it? *á* Non-Verbal Communication - do we reveal our true feelings in our body language? *á* Development of Personality - what exactly is Anti-Social Personality Disorder? *á* Prejudice and Discrimination - are we bound to discriminate against people who are unlike us? *á* Learning - how to remove your fear of spiders/snakes/flying/open spaces or anything else using the principles of learning. *á* Aggression - is aggression born into us? Is it in our hormones? Or do we learn to fight? *á* Research Methods and the Ethics of Psychology - psychology is based on evidence, not just ideas. But what type of study constitutes good evidence and how should we treat the people in our studies?

This excellent new resource provides a comprehensive set of exam questions for students to test their exam performance using advice from experienced examiners.

Business Review

Psychology for the IB Diploma Second edition

This new edition of the Holt and Lewis AQA Psychology textbook offers comprehensive coverage of the new AQA syllabus. Written by two experienced teachers, examiners and textbook authors, this revised edition accommodates the changes to the English AQA specification, with thorough coverage of both AS level and A level year 1. 'Ask an examiner' hints and tips, glossaries, web links and exam-style practice questions provide everything students need to learn and succeed. This easy-to-read, visually engaging textbook also features: evaluations of key studies, to encourage reflection and critical analysis, aid understanding and give context; detailed exploration of research methods, to help develop analytical and mathematical skills; 'Ask an examiner' hints and tips, practice questions and a section on exam preparation and revision, providing everything students need to prepare for their exams; lists of key terms, QR codes and web links to help explain key issues, carefully chosen images to promote debate and discussion and help ideas stick, colour-coded material for ease of use and checklists to break down everything you need to know for each topic, clearly identified A level only material, enabling it to be easily distinguished from AS material.

This book will be a great help to the A Level Psychology student. It gives lots of opportunity

*to practice those all-important Research Method skills which examiners like to see.
Focused revision for your best possible grade.*

Teaching Psychology 14-19

AS and A-level Year 1

Aqa A2 Psychology Unit 3

AQA Psychology A Level - Research Methods

AQA(B) AS Psychology Student Unit Guide New Edition: Unit 1 Introducing Psychology

AQA Psychology A Level Paper Three: Relationships

Teaching Psychology 14-19 - first published as **Teaching Post-16 Psychology** - is a core text for all training psychology teachers, as well as experienced teachers engaged in further study and professional development. Taking a reflective approach, Matt Jarvis explores key issues and debates against a backdrop of research and theory, and provides guidance on practical ideas intended to make life in the psychology classroom easier. With an emphasis on the application of psychology to teaching psychology, it clearly and comprehensively covers the knowledge essential to develop as a successful teacher. Key issues considered include: The appeal of psychology and what the subject can offer students The psychology curriculum and advice on how to choose a syllabus Principles of effective teaching and learning Teaching psychological thinking Differentiated psychology teaching Choosing and developing resources Using technology effectively. With a new chapter exploring the role of practical work in the post-coursework era, this second edition considers psychology teaching across the 14-19 age range and has been updated in light of the latest research, policy and practice in the field. **Teaching Psychology 14-19** is an essential text for all those engaged in enhancing their understanding of teaching psychology in the secondary school.

AQA Psychology for AS and A-level Year 1 is the definitive textbook for the new 2015 curriculum. Written by eminent psychologist Professor Michael Eysenck, in collaboration with a team of experienced A-level teachers and examiner, the book enables students not only to pass their exams with flying colours, but also to fully engage with the science of psychology. As well as covering the six core topics students will study, the book includes: Activities which test concepts or hypotheses, bringing theory to life Key research studies explained and explored, showing the basis on which theory has developed Case studies which show how people's lives are affected by psychological phenomena Evaluation boxes which critically appraise key concepts and theories Self-assessment questions which encourage students to reflect on what they've learnt Section summaries to support the understanding of specific ideas – perfect for revision Exam hints which steer students towards complete and balanced answers Key terms defined throughout so students aren't confused by new language 200 figures, tables and photos End of chapter further reading to enable students to develop a deeper understanding End of chapter revision questions and sample exam papers to consolidate knowledge and practice exam technique A full companion website with a range of further resources for both students and teachers, including revision aids and class materials Incorporating greater coverage of research methods, as well as key statistical techniques, the sixth edition of this well-loved textbook continues to be the perfect introduction to psychology. Accessible yet rigorous, the book is the ideal textbook for students taking either the AS course or year 1 of the A-level.
