"A recounting of Alexander Von Humboldt's five year expedition in South America. Alexander von Humboldt (1769-1859) was an intrepid explorer and the most famous scientist of his age. His theories and ideas were profoundly influenced by a five-year exploration of South America. Complete with excerpts from Humboldt's own diaries, atlases, and publications, Wulf gives us an intimate portrait of the man who predicted human-induced climate change, fashioned poetic narrative out of scientific observation, and influenced iconic figures such as Simón Bolívar, Thomas Jefferson, Charles Darwin, and John Muir. This gorgeous account of the expedition not only shows how Humboldt honed his groundbreaking understanding of the natural world but also illuminates the man and his passions"--

Being an Examination Into the Nature of the First Division of the Elementary Substances of Life

"The History of the Standard Oil Company" is an exposé about the Standard Oil Company, run by oil tycoon John D. Rockefeller, the richest figure in American history. The inspiration behind this book was largely fueled by author's childhood experiences. Her father worked for Standard Oil and lived through what she called "hate, suspicion, and fear that engulfed the community." As a direct witness to the schemes and horizontal integration of John D. Rockefeller and his associates, Ida Tarbell began building the foundations of "The History of the Standard Oil Company" early on, using her own discontent as a starting point. This book inspired many other journalists to write about trusts and large businesses that attempted to gain monopolies in various industries.

This handbook in practical spirituality proposes that the level of stress, violence, fear and disconnect from Nature in the global society has risen in direct proportion to a fall in the collective level of conscious awareness. In order to reverse this trend a conscious impulse is required. Human beings need to rediscover the mystical underpinning of all religions and the engine of spiritual transformation: the art of presence. Only by learning to be present and stay present is it possible to dissolve harmful energy - in the form of false opinions and negative feelings - and create positive energy that imbues actions with intelligence, compassion and respect for the sacredness of all life.

To this end, a practice in sensory awareness is offered. It is called 'the Pause'. Pausing affirms the body-mind continuum by empowering the senses as conduits of conscious awareness. When pausing is then applied to ordinary activities such as speaking, working, thinking and relating to others, spiritual evolution accelerates. The fruit of a re-awakened life is healing – for ourselves, for society, and for the entire Earth community.

The latest edition of The Illustrated Book of Development Definitions breaks new ground. It addresses traditional and new planning problems: natural and industrial disasters such as hurricanes and oil spills; new housing types and living accommodations; changes in urban design and practice like new urbanism; sustainability; pedestrian and bicycle friendly environments; and more. Joining Harvey S. Moskowitz and Carl G. Lindbloom, authors of the first three editions, are two prominent, nationally known planners: David Listokin and Richard Preiss. Attorney Dwight H. Merriam adds legal annotations to almost all 2,276 definitions. These citations from court decisions bridge the gap between land use theory and real world application, bringing a new dimension to this edition. More than 20,000 copies of previous editions were sold over four decades to professionals and government representatives, such as members of planning and zoning boards and municipal governing bodies. This first revision in ten years updates what is widely acknowledged as an essential, standard reference for planners.

On a day when everything goes wrong for him, Alexander is consoled by the thought that other people have bad days too.

In Disappearing Persons, psychoanalyst Benjamin Kilborne looks at how we control appearance as an attempt to manage or take charge of our feelings. Arguing that the psychology of appearance has not been adequately explored, Kilborne deftly weaves together examples from literature and his own clinical practice to establish shame and appearance as central fears in both literature and life, and describes how shame about appearance can generate not only the wish to disappear but also the fear of disappearing. A hybrid of applied literature and psychoanalysis, Disappearing Persons helps us to understand the roots of the psychocultural crisis confronting our increasingly appearance-oriented, shame-driven society.
