

Diploma In International Financial Reporting Who Can Study

IFRSs, the standards set by the International Accounting Standards Board (IASB), are complex and sometimes obscure. Understanding their implications and applying them appropriately requires something special: and that is why International GAAP 2016 is the essential tool for anyone applying, auditing, interpreting, regulating, studying and teaching international financial reporting. It provides expert interpretation and practical guidance for busy professionals, and includes, in every chapter, detailed analysis of how complex financial reporting problems can be resolved appropriately and effectively. The International Financial Reporting Group of Ernst & Young includes financial reporting specialists from throughout the world. Complex technical accounting issues are explained clearly in a practical working context that enables immediate understanding of the point at issue. International GAAP 2016 is the only globally focused work on IFRSs. It is not constrained by any individual country's legislation or financial reporting regulations, and it ensures an international consistency of approach unavailable elsewhere. It shows how difficult practical issues should be approached in the complex, global world of international financial reporting, where IFRSs have become the accepted financial reporting system in more than 100 countries. This integrated approach provides a unique level of authoritative material for anyone involved in preparing, interpreting or auditing company accounts, for regulators, academic researchers and for all students of accountancy. All aspects of the detailed requirements of IFRS are dealt with on a topic-by-topic basis. Each chapter of International GAAP 2016 deals with a key area of IFRS and has a common structure for ease of use:

- An introduction to the background issues
- An explanation of relevant principles
- A clear exposition of the requirements of IFRS
- A discussion of the implications in practice and possible alternative solutions available
- Worked examples

International Financial Reporting Standards (IFRS) and Indian Accounting Practices

Under IFRS, U.S. GAAP, and the SEC rules and regulations, business enterprises must recognise measure and disclose information regarding equity items on the face of the statement of financial position, other specific statements, or in the notes to the financial statements. However, under both IFRS and U.S. GAAP there is no all-inclusive general standard on stockholders' equity. This book clarifies the process of reporting stockholders' equity in a manner which can be reconciled under all the relevant standards. "Not only has the author addressed the informational needs of the players in the accounting industry, he has also drawn, based on his vast experience, practical implications of reporting under both standards."—Noraini Mohd Nasir, *Journal of Financial Reporting and Accounting*

Economic reforms initiated in India since early 1990s have led to increasing attention being devoted to accounting standards as a means towards ensuring potent and transparent financial reporting by corporations. International Financial Reporting Standards (IFRSs) – issued by the International Accounting Standards Board (IASB) as the uniform language of business to protect the interests of international investors – have brought into focus the need for reforms in accounting procedures in different countries. IFRSs have been made applicable in India for specified business entities. The new accounting norms have posed challenges for business enterprises in terms of presentation of accounts, and accounting policies and procedures. This book explains the requirements of IFRSs and the attending implementation hurdles in India.
