*There is a skeleton in the Mattatuck Museum in Connecticut. It has been in the town for over 200 years. In 1996, community members decided to find out what they could about it. Historians discovered that the bones were those of a slave name Fortune, who was owned by a local doctor. After Fortune's death, the doctor rendered the bones. Further research revealed that Fortune had married, had fathered four children, and had been baptized later in life. His bones suggest that after a life of arduous labor, he died in 1798 at about the age of 60. Merilyn Nelson wrote *The Manumission Requiem* to commemorate Fortune's life. Detailed notes and archival photographs enhance the reader's appreciation of the poem.*

Libraries and bookshops around the world have displayed over the years numerous books on bookkeeping and accountancy. In the very first chapter of this book, therefore, the question is asked: why then write yet another book? The traditional approach has been to introduce double entry bookkeeping principles almost at the outset and then expound those principles with the help of examples. In this book, no mention is made of double entry until Chapter 5. The book starts by demonstrating in a cl...

Up-to-date, expanded, and detailed IFRS coverage is now included. The SEC 2014 roadmap is explored in all chapters. Comprehensive coverage of real-world financial crisis issues is presented. Accountants will also find more discussions on the increasing role of management's assessment of internal controls over financial reporting.

Throughout history, some books have changed the world. They have transformed the way we see ourselves - and each other. They have inspired debate, dissent, war and revolution. They have enlightened, outraged, provoked and comforted. They have enriched lives - and destroyed them. Now Penguin brings you the works of the great thinkers, pioneers, radicals and visionaries whose ideas shook civilization and helped make us who we are. Thoreau's account of his solitary and self-sufficient home in the New England woods remains an inspiration to the environmental movement - a call to his fellow men to abandon their striving, materialistic existences of 'quiet desperation' for a simple life within their means, finding spiritual truth through awareness of the sheer beauty of their surroundings.

Each of these articles was published in a journal that is often not accessible and reprinted here has brought them together in one place. internally generated, is the major constituent of the value of many listed companies. Accounting aims to provide users of financial statements with useful information, and more than fifty current International Financial Reporting Standards prescribe accounting disclosure requirements in minute detail. However, these Standards dismiss internally generated goodwill with a single brief provision that it is not to be brought to account at all. The impairment regime now laid down for dealing with purchased goodwill contains severe flaws, while previous methods have also been found to be unsatisfactory. This book traces the history of the goodwill accounting controversy in detail and demonstrates that it has been a prime example of an issue 'conceived in a way that it is in principle unsolvable'. It explores the problem of recognising the importance of goodwill as a whole and finding a way of presenting meaningful information regarding it in the context of the financial statements. The author's proposed solution builds upon research undertaken and uses a Market Capitalization Statement, based on a modification of nineteenth century 'double accounting' in a modern context. Examples show that the proposed Market
