Inspired by the pre-Hispanic codices that escaped immolation during colonial invasions, this artists' book opens out in accordion folds expanding to a length of over 21 feet. Rice has created a series of beautiful and jarring montages in which the mixture of languages, slang, poetry, and prose of Gomez-Pena's performance texts are woven through and around Chagoya's collages filled with pre-Hispanic drawings, colonial-era representations of New World natives, and comic book superheroes. Irreverent to the last, Gomez-Pena and Chagoya employ iconic figures and persistent stereotypes to overturn the fantasies of nationalism, ethnocentrism, and historical amnesia that cloud international relations. Rice's masterful typographic compositions orchestrate the text's many voices and views, offering a history of the Americas which must be read forward and backward, in fragments and in recurring episodes - in short, as history itself tends to unfold. About the Authors Guillermo Gomez-Pena was born in Mexico City in 1955 and came to the U.S. in 1978. His work, which includes performance art, poetry, journalism, criticism, and cultural theory, explores cross-cultural issues and North/South relations. He is the recipient of an American Book Award for The New World Border (City Lights) and a MacArthur Foundation Genius Award, among many other honors. Enrique Chagoya is a Mexican-born painter and printmaker who has been living and working in the U.S. since 1977. The recipient of two NEA Fellowships, his most recent show of paintings was at the DeYoung Museum in San Francisco. He currently teaches at Stanford University. Felicia Rice is a book artist, typographer, printer, and publisher whose work has earned her many honors. She lectures and exhibits internationally, and her books are represented in the collections of various museums and libraries. She currently directs the graphic design and production program at the University of California, Santa Cruz Extension.

Once a classic drawing instruction manual that was used to teach countless children and young adults how to draw, Drawing Made Easy by E. G. Lutz is now back in print after many years absence. Hallmarks of his approach are simplifying complex shapes as well as working from big to small. These concepts, outlined in Drawing Made Easy, are simple enough for children to understand and yet the same principles are evident in many Old Master drawings. Also contained within this reprinted volume are selections from Lutz's earlier book, Practical Drawing.

Figure Study Made Easy

Demystifying its subject for professionals and students alike, this title inspires confidence in colour's application to graphic design, illustration, painting, textile art, and textile design.

From the Introduction: If you think about it, all life drawing and painting is at some point being done from the artist's memory, even if that memory is only a few seconds old. Every time the artist takes their eyes off of the model or scene and looks at their paper or canvas, their visual memory is involved.

What if that artist's visual memory was highly trained? That artist might need the model for a shorter period of time, or she might have a more productive time when the model is in pose. He might be better at painting all of the fleeting effects that nature throws at us when we are landscape painting en plein air. Although I encourage you to consistently engage in memory-drawing practice, it should not supplant your regular art exercises. Memory-drawing ought to be done in addition to your regular art training, not instead of it. In a perfect world it would be integrated into traditional arts instruction, but the reality is that you will most likely be training your visual memory on your own. Memory Drawing: Perceptual Training and Recall exists to guide you in doing just that. It will also help you improve your abilities to remember fleeting effects, seize essentials, and even enhance your imagination.

Subject Covered: The human figure is a three dimensional structure of solid blocks havingweight and to draw it convincingly you must learn how to create an illusion of solid form ona two dimensional sheet of paper.The topics in this book are arranged conveniently in step by step sequential chapters, whichwill show you how to capture the spirit and evolution of the figure. The History of Indian Art

Memory Drawing

An authoritative guide to one of the world's most important collections of African-American art, with works by artists from Romare Bearden to Kehinde Wiley. The artists featured in Black Refractions, including Kerry James Marshall, Faith Ringgold, Nari Ward, Norman Lewis, Wangechi Mutu, and Lorna Simpson, are drawn from the renowned collection of the Studio Museum in Harlem. Through exhibitions, public programs, artist residencies, and bold acquisitions, this pioneering institution has served as a nexus for artists of African descent locally, nationally, and internationally since its founding in 1968. Rather than aim to construct a single history of "black art," Black Refractions emphasizes a plurality of narratives and approaches, traced through 125 works in all media from the 1930s to the present. An essay by Connie Choi and entries by Eliza A. Butler, Akili Tommasino, Taylor Aldridge, Larry Ossei Mensah, Daniela Fifi , and other luminaries contextualize the works and provide detailed commentary. A dialogue between Thelma Golden, Connie Choi, and Kellie Jones draws out themes and challenges in collecting and exhibiting modern and contemporary art by artists of African descent. More than a document of a particular institution's trailblazing path, or catalytic role in the development of American appreciation for art of the African diaspora, this volume is a compendium of a vital art tradition.

"Garmenting: Costume as Contemporary Art centers on contemporary artists' explorations of how dress both expresses and shapes who we are--our personal, cultural, and political identities--and it is my hope that their work will help stimulate discussion and foster understanding during these troubled times. As the quintessential "outside the box" thinkers, artists have always been on the front lines of driving and processing social change; there is a reason cutting-edge art has long been referred to by a military term, "avant-garde." As society rebuilds, artists' insights about our world and how we inhabit it are more necessary than ever"--

National Advisory Committee on Creative and Cultural Education was established in 1998 "to make recommendations to the Secretaries of State on the creative and cultural development of young people through formal and informal education: to take stock of current provision and to make proposals for principles, policies and practice" (-- p. 4). This is its report.
