Four Corners is an integrated four-skills course for adults and young adults who want to use English to communicate effectively in daily life. Easy and enjoyable to teach. It combines proven communicative methodology with a practical outcomes-based approach. Four Corners features a clear presentation of vocabulary, a thorough grammar syllabus, and an everyday functional language lesson in every unit together with systematic practice of all four skills. Four Corners places special emphasis on helping students become confident and competent speakers of English. Speaking activities at the end of every lesson, tied to clearly labeled measurable outcomes, enable students to see the results of their learning and help them see their progress.

Truly personal handheld and wearable technologies should be small and unobtrusive and allow access to information and computing most of the time and in most circumstance. Complimentary, environment-based technologies make artifacts of our surrounding world computationally accessible and facilitate use of everyday environments as a ubiquitous computing interface. The International Symposium on Handheld and Ubiquitous Computing, held for the first time in September 1999, was initiated to investigate links and synergies in these developments, and to relate advances in personal technologies to those in environment-based technologies. The HUC 99 Symposium was organised by the University of Karlsruhe, in particular by the Telecooperation Office (TecO) of the Institute for Telematics, in close collaboration with ZKM Karlsruhe, which generously hosted the event in its truly inspiring Center for Arts and Media Technology. The symposium was supported by the Association of Computing Machinery (ACM) and the German Computer Society (Gesellschaft für Informatik, GI) and held in cooperation with a number of special interest groups of these scientific societies. HUC 99 attracted a large number of paper submissions, from which the international programme committee selected 23 high-quality contributions for presentation at the symposium and for inclusion in these proceedings. In addition, posters were solicited to provide an outlet for novel ideas and late-breaking results; selected posters are also included with these proceedings. The technical programme was further complemented by four invited keynote addresses, and two panel sessions.

An essential teacher's companion to an innovative, uniquely visual English-language course, this e-guide helps English teachers--including those for whom English is not their native language--create clear, focused lesson plans, explain difficult concepts in a simple and concise way, and make language learning exciting, intuitive, and incredibly easy. This teacher's e-guide is designed to accompany English for Everyone, a comprehensive course in English as a foreign language for adults. English for Everyone combines innovative and systematic visual teaching methods with the best of DK design to make the English language easy to understand and learn. Key language skills, grammar rules, and vocabulary are reinforced with listening, speaking, reading, and writing exercises, available in print and digital formats. The English for Everyone Teacher's Guide helps busy classroom teachers or one-on-one tutors get the most out of using the course with their students. Its step-by-step guide to the crystal-clear, tightly structured teaching method shows teachers how to explain even the trickiest points of English in an engaging, easy-to-follow way. It also includes instructions for the series' highly versatile exercises, which are primarily suitable for homework, independent study, or one-on-one tutoring, but are readily adapted for classroom or group activities.

Enhanced by a 15,000-word technical glossary, a manual for creating quality sound for live performances covers such issues as analyzing venue needs and setting up and testing equipment.

A level 4 Oxford Bookworms Library graded reader. This version includes an audio book: listen to the story as you read. Retold for Learners of English by Patrick Nobes. Dartmoor. A wild, wet place in the south-west of England. A place where it is easy to get lost, and to fall into the soft green earth which can pull the strongest man down to his death. A man is running for his life. Behind him comes an enormous dog - a dog from his worst dreams, a dog from hell. Between him and a terrible death stands only one person - the greatest detective of all time, Sherlock Holmes.

In this book, legal, biomedical, psychosocial, and social science scholars and practitioners offer the first comparative account of the increasing dependence on expertise in the asylum and refugee status determination process. This volume presents a comprehensive study of the relevance of experts, as mediators of culture, who are called upon to corroborate, substantiate credibility, and serve as translators in the face of confusing legal standards that require proof of new forms and reasons for persecution around the globe. The authors provide insights into the evidentiary burdens on asylum seekers and the expanding role of expertise in the forms of country-conditions reports, biomedical and psychiatric evaluations, and the emerging field of forensic linguistic analysis in response to emerging forms of persecution, such as gender-based or sexuality-based persecution.

communication in the last century, giving students a clear understanding of how the media of yesterday shaped the media world of today. Now Media, Fourth Edition (formerly Electronic Media: Then, Now, Later) provides a comprehensive view of the beginnings of electronic media in broadcasting and the subsequent advancements into 'now' digital media. Each chapter is organized chronologically, starting with the electronic media of the past, then moving to the media of today, and finally, exploring the possibilities for the media of the future. Topics include the rise of social media, uses of personal communication devices, the film industry, and digital advertising, focusing along the way on innovations that laid the groundwork for 'now' television and radio and the Internet and social media. New to the fourth edition is a chapter on the amazing world of virtual reality technology, which has spawned a 'now' way of communicating with the world and becoming a part of video content, as well as a discussion of the impacts of the COVID-19 pandemic on media consumption habits. This book remains a key text and trusted resource for students and scholars of digital mass communication and communication history alike. The new 'now' edition also features updated online instructor materials, including PowerPoint slides and test banks. Please visit www.routledge.com/cw/medoff to access these support materials.

Beyond Sound is a must-read for anyone who loves music technology and wants to build a career in this competitive, fast-paced world. Author Scott L. Phillips draws on his seventeen-year career as a technology trainer and educator, and his extensive network of music technology professionals, to present an intimate view of the exciting world of music technology. The book offers an in-depth consideration of music technology education, including looks at specific programs and a clear explanation of different types of degrees. Moreover, it provides practical guidance on career preparation, including how to get a great internship, how to land that first job, and how to make connections and move up in a variety of businesses from recording to television and film to video games. And Phillips brings stories from successful professionals, who share their experiences, advice, and suggestions.

Proceedings of the 5th International Conference on Education in Muslim Society (ICEMS) contain papers from researchers, academicians, teachers, school principals, government agencies, and consultants in various fields of education, social sciences, humanities, Arabic and English linguistics. There were 110 full papers submitted and after reviewed by at least two reviewers, 39 of them are successfully published in the proceedings. The articles were submitted and presented at the 5th ICEMS held by Faculty of Educational Sciences (FITK) supported by Center for Research and Community Service (LP2M) UIN Syarif Hidayatullah Jakarta. The 5th ICEMS centers on the issue of creativity and innovation in teaching and learning, a crucial issue to be discussed to improve the teaching and learning quality which in turn ultimately raise the overall education quality. In the future, the subsequent proceeding would be able to consistently grow into one prestigious annual proceeding by publishing papers from varied different fields of study, particularly in education.

An innovative, new multi-level course for the university and in-company sector. Business Advantage is the course for tomorrow's business leaders. Based on a unique syllabus that combines current business theory, business in practice and business skills - all presented using authentic, expert input - the course contains specific business-related outcomes that make the material highly relevant and engaging. The Business Advantage Advanced level books include input from leading institutions and organisations, such as: Alibaba, Dyson, Piaggio, and The Cambridge Judge Business School. The Teacher's Book comes with photocopyable activities, progress tests and worksheets for the DVD which accompanies the Student's Book. What will the future of wireless communications look like? What drives mobile communications systems beyond 3G? In Next

Generation Mobile Systems the authors answer these questions and others surrounding the new technologies. The book examines the current research issues driving the wireless world and provides an inclusive overview of how established technologies will evolve to suit next generation mobile systems. While the term '4G' already dominates research in industry and academia, there are still numerous hurdles to take before this ambitious concept can become reality. Acclaimed researchers from NTT-DoCoMo take up the debate of what type of mobile communications will emerge in the post-3G era. Next Generation Mobile Systems: Covers the evolution of IP-based systems and IP mobility. Gives a detailed overview of radio-access technologies and wireless LANs. Explains APIs for mobile systems and IP mobility. Addresses middleware and applications, including terminal platform technologies, multimedia, and wireless web services. Discusses security in future mobile networks, including sections on Cryptographic Algorithms and Protocols for XG, Authentication, Authorization, and Accounting, and Security Policy Enforcement for Downloaded Code. This valuable resource will provide communications engineers, telecommunications managers and researchers in industry and academia with a sound understanding of the future direction of mobile technology.

This book constitutes the refereed proceedings of the First International Conference on Data Warehousing and Knowledge Discovery, DaWaK'99, held in Florence, Italy in August/September 1999. The 31 revised full papers and nine short papers presented were carefully reviewed and selected from 88 submissions. The book is divided in topical sections on data warehouse design; online analytical processing; view synthesis, selection, and optimization; multidimensional databases; knowledge discovery; association rules; indexing and object similarities; generalized association rules and data and web mining; time series data bases; data mining applications and data analysis.

With the ever-increasing volume of data, proper management of data is a challenging proposition to scientists and researchers, and given the vast storage space required, multimedia data is no exception in this regard. Scientists and researchers are investing great effort to discover new space-efficient methods for storage and archiving of this data. Intelligent Innovations in Multimedia Data Engineering and Management provides emerging research exploring the theoretical and practical aspects of storage systems and computing methods for large forms of data. Featuring coverage on a broad range of topics such as binary image, fuzzy logic, and metaheuristic algorithms, this book is ideally designed for computer engineers, IT professionals, technology developers, academicians, and researchers seeking current research on advancing strategies and computing techniques for various types of data.
