*A candid, feminist, and personal deep dive into the science and culture of pregnancy and motherhood Like most first-time mothers, Angela Garbes was filled with questions when she became pregnant. What exactly is a placenta and how does it function? How does a body go into labor? Why is breast best? Is wine totally off-limits? But as she soon discovered, it's not easy to find satisfying answers. Your obstetrician will cautiously quote statistics; online sources will scare you with conflicting and often inaccurate data; and even the most trusted books will offer information with a heavy dose of judgment. To educate herself, the food and culture writer embarked on an intensive journey of exploration, diving into the scientific mysteries and cultural attitudes that surround motherhood to find answers to questions that had only previously been given in the form of advice about what women ought to do—rather than allowing them the freedom to choose the right path for themselves. In Like a Mother, Garbes offers a rigorously researched and compelling look at the physiology, biology, and psychology of pregnancy and motherhood, informed by in-depth reportage and personal experience. With the curiosity of a journalist, the perspective of a feminist, and the intimacy and urgency of a mother, she explores the emerging science behind the pressing questions women have about everything from miscarriage to complicated labors to postpartum changes. The result is a visceral, full-frontal look at what's really happening during those nine life-altering months, and why women deserve access to better care, support, and information. Infused with humor and born out of awe, appreciation, and understanding of the female body and its strength, Like a Mother debunks common myths and dated assumptions, offering guidance and camaraderie to women navigating one of the biggest and most profound changes in their lives.*

The fourth book in Dawn Dais's popular *Sh!t No One Tells You* series offers "been there, freaked out about that" advice for expectant parents The fourth title in Dawn Dais's popular parenting series, *The Sh!t No One Tells You About Pregnancy* is quite possibly the funniest, and most heartfelt, yet. After all, pregnancy is not all about scanning Pinterest for baby shower themes and registering for ironic onesies, and sometimes the less flattering aspects of gestation have a way of dimming a bit of that so-called pregnancy glow. Not to worry! Dawn is here, ready to shepherd you through the experience of one

human body taking on the task of growing another human body. (Spoiler alert: It ain't always pretty.) Dawn covers it all, sharing expert lists, tips, warnings, and even a series of Parent-Training Workouts designed to increase readers' tolerance to the various indignities of parenthood, like peeing with an audience and surviving an afternoon in Chuck E. Cheese. *The Sh!t No One Tells You About Pregnancy* is a must-have guide for expectant moms (and their partners!) who are looking for some counsel, comedy, and camaraderie during their ultimate countdown to parenthood.

*A fresh, new pregnancy guide—the first complete functional medicine book—offering women and their partners a comprehensive approach to maintain and enhance health and wellness before, during, and after pregnancy. The Wise Woman's Guide to Your Healthiest Pregnancy and Birth combines the expertise of top-tier physical therapist Patricia Ladis—who works with superstar athletes, professional dancers, and celebrities—with Dr. Anita Sadaty, a highly regarded holistic ob-gyn with a celebrity clientele. Together, they have devised a six-step protocol beginning the six months before conception continuing forty days post-birth and beyond, incorporating holistic principles that encourage optimal wellness for mother, partner, and baby. Whether they are in their 20's, 30's or 40's, this book empowers readers to be in tune with their bodies during all stages of pregnancy, and is the first book by a functional medicine dream-team aligning medical and structural body issues to avoid such potential pregnancy outcomes as osteoporosis, sciatica, pelvic prolapse, structural weakness, and postpartum depression. Each of the six stages organizes Ladis and Sadaty's holistic principles into five easy-to-follow aspects: Body, Movement, Breathing, Nourishment, and Wisdom. They include practical applications such as foods to help reduce internal inflammation, specific exercises—with instructive photos—in each stage, breathing techniques to lower stress, and “pearls of wisdom” backed by science exploring a multicultural history of this special time in a woman's life. For the first time, a pregnancy guide considers the importance of choices you make six months prior to conception, and the effect on genes. When both members of a couple are calm, fit, and well-nourished, the latest science suggests that together they are less likely to pass on negative genes to a child.*
