

Garfield 2017 Day To Day Calendar

The perfect holiday gift for fans of the world’s favorite feline! MAKE WAY FOR GARFIELD! The tubby tabby is back, and he’s livin’ larger than ever! So whether he’s enveloping Pooky in his Herculean hug, arguing with the talking scale, or munching on his masterpiece, the Leaning Tower of Pizza, Garfield’s motto is always the same: Bigger is better!

NOW IN PAPERBACK The “gripping” (New York Times) and “Hitchcockian”(Publishers Weekly) story of how a nurse, a car dealership worker, and a forensic expert took on the nation’s largest banks A Kirkus Reviews and The Week best book of the year, David Dayen’s Chain of Title is a riveting work that recalls A Civil Action, Erin Brockovich, and Flash Boys, recounting how three ordinary Floridians—a car dealership worker, a cancer nurse, and an insurance fraud specialist—helped uncover the largest consumer crime in American history, challenged the most powerful institutions in America, and—for a brief moment—brought the corrupt financial industry to its knees. Lisa Epstein, Michael Redman, and Lynn Szymoniak did not work in government or law enforcement. They had no history of anticorporate activism. Instead they were all foreclosure victims, and while struggling with their shame and isolation they committed a revolutionary act: closely reading their mortgage documents, discovering the deceit behind them, and building a movement to expose it. Harnessing the power of the Internet, they revealed how the financial crisis and subsequent recession were fundamentally based upon a series of frauds that kicked millions out of their homes because of false evidence by mortgage companies that had no legal right to foreclose. As Rolling Stone’s Matt Taibbi notes: “Chain of Title is a sweeping work of investigative journalism that traces the arc of a criminally underreported story in America, the collapse of the rule of law in the home mortgage industry.”

Gerald K. Stone has collected books about Canadian Jewry since the early 1980s. This volume is a descriptive catalog of his Judaica collection, comprising nearly 6,000 paper or electronic documentary resources in English, French, Yiddish, and Hebrew. Logically organized, indexed, and selectively annotated, the catalog is broad in scope, covering Jewish Canadian history, biography, religion, literature, the Holocaust, antisemitism, Israel and the Middle East, and more. An introduction by Richard Henkis discusses the significance of the Catalog and collecting for the study of the Jewish experience in Canada. An informative bibliographical resource, this book will be of interest to scholars and students of Canadian and North American Jewish studies.

Hermes Press is proud to announce their second major collaboration with Paws, Incorporated producing another unique title featuring everyone’s favorite orange cat, GARFIELD! Hermes and Paws have come together to treat the world to a compendium of the greatest examples of original artwork from classic Garfield daily and Sunday comic strips in their original size, including rare unpublished strips, that has never been seen before (the Sunday strips will be reproduced in a slightly smaller format due to their huge size)! This historic archival reprint will feature hundreds of pieces of original production art from the comic strip, with an introductory essay from Jim Davis himself! If you love Garfield and want to experience the strips as they were originally drawn, this is the book for you! From the very beginning in 1979 to the last non-digital strip in 2011, this purrfect book shows you Garfield like you’ve never seen him before! Jim Davis’ Garfield: The Original Art Daily and Sunday Archive dives deep into the treasures contained in the vaults of Paws, Inc. See how Garfield has evolved over the years! See gags with characters that no longer appear in the strip (We miss you Lyman!) in the original inks, with notations galore from the man behind it all, Jim Davis! Garfield, Odie, and the rest of the gang come to life in this full-sized archival reprint.

Garfield Older & Wiser

The One Year Book of Amazing Stories

For each of the 366 days of the year, Paul Brandus of West Wing Reports offers little-known, fascinating facts; historical anecdotes; and pithy quotes from the 45 presidents of the United States. This Day in Presidential History will surprise its readers with the inside information that Brandus has uncovered in his years on the White House beat.

Written by leaders in the additions field, 100 authors from six countries, this handbook is a thoroughly comprehensive resource. Philosophical and legal issues are addressed, while conceptual underpinnings are provided through explanations of appetitive motivation, incentive sensitization, reward deficiency, and behavioral economics theories. Major clinical and research methods are clearly mapped out (e.g. MRI, behavioral economics, interview assessments, and qualitative approaches), outlining their strengths and weaknesses, giving the reader the tools needed to guide their research and practice aims. The etiology of addiction at various levels of analysis is discussed, including neurobiology, cognition, groups, culture, and environment, which simultaneously lays out the foundations and high-level discourse to serve both novice and expert researchers and clinicians. Importantly, the volume explores the prevention and treatment of such addictions as alcohol, tobacco, novel drugs, food, gambling, sex, work, shopping, the internet, and several seldom-investigated behaviors (e.g. love, tanning, or exercise).

The production of years of research, A Man for All Oceans is the most comprehensive biography of Slocum ever published, and the first written by a small-boat sailor. Author/historian Grayson uncovered previously unknown original source materials to shed new light on one of history ’ s greatest sailors while answering questions that have been asked ever since the publication of Sailing Alone. In June 1898, three years and two months after departing Boston in his aged oyster sloop Spray, Captain Joshua Slocum made land fall in New England and became the first person ever to sail alone around the world. The voyage capped a lifetime of adventure for the indomitable Slocum, who had advanced from seaman to captain during the challenging final years of commercial sail, surviving hurricanes, mutinies, shipwreck, and the death at sea of his beloved first wife, Virginia. Sailing Alone Around the World, Slocum ’ s book about his circumnavigation, is a seafaring classic, unmatched for adventure and literary verve, and has never been out of print since its publication in 1900. Yet despite several biographies over the decades, Slocum the man has remained unknowable to his legions of admirers, the facts of his life and career as elusive as a ship on a fogbound sea. Here is the real story of Slocum ’ s Nova Scotia childhood, his seafaring career, and how he became an American citizen. Grayson gives ample evidence of Slocum ’ s uncanny genius as a navigator while also noting the occasional role that good luck played in his voyages, including his odyssey from Brazil to the United States in the self-designed and built 35-foot Liberdade. And Grayson brings a sailor ’ s perspective to Slocum ’ s solo circumnavigation and mysterious disappearance at sea. A fascinating appendix compares Sailing Alone Around the World with Thoreau ’ s Walden and shows that Slocum ’ s simple lifestyle and self-sufficiency prefigured today ’ s emphases on the environment and living responsibly. Previously unpublished photographs bring Slocum ’ s world to life, and detailed maps trace the adventures of a sailor who knew the world like the back of his hand. This biography reads like an adventure narrative and will serve as the standard work on Joshua Slocum for years to come.

The Howard University protests from the perspective and worldview of its participants We Are Worth Fighting For is the first history of the 1989 Howard University protest. The three-day occupation of the university ’ s Administration Building was a continuation of the student movements of the sixties and a unique challenge to the politics of the eighties. Upset at the university ’ s appointment of the Republican strategist Lee Atwater to the Board of Trustees, students forced the issue by shutting down the operations of the university. The protest, inspired in part by the emergence of “ conscious ” hip hop, helped to build support for the idea of student governance and drew upon a resurgent black nationalist ethos. At the center of this story is a student organization known as Black Nia F.O.R.C.E. Co-founded by Ras Baraka, the group was at the forefront of organizing the student mobilization at Howard during the spring of 1989 and thereafter. We Are Worth Fighting For explores how black student activists—young men and women—helped shape and resist the rightward shift and neoliberal foundations of American politics. This history adds to the literature on Black campus activism, Black Power studies, and the emerging histories of African American life in the 1980s.

Its Struggles and Promise

Contemporary General Stone Collection of Judaica

The renowned feline philosopher shares his hard-won wisdom on life as he argues that laziness is its own reward, alarm clocks were made for smashing, maturity is overrated, and if you can't take it with you, eat it now.

A recipe for laughter! The famous foodie is back with a banquet of all-new strips to satisfy your comic cravings. Whether he's toasting a whole loaf of bread because Jon's butter expires at midnight, fixing a taste-bud melting liverwurst, horseradish, and anchovy paste sandwich, or preparing Grandma's special soup (hold the coyote!), Garfield makes sure fun is always on the menu!

Since the birth of our nation and the election of the first president, groups of organized plotters or individuals have been determined to assassinate the chief executive. From the Founding Fathers to the Great Depression, three presidents have been assassinated: Abraham Lincoln, James Garfield, and William McKinley. However, unknown to the general public, almost all presidents have been threatened, put in danger, or survived "near lethal approaches" during their terms. Plotting to Kill the President reveals the numerous, plotters, and individuals have threatened the lives of American presidents, from George Washington to Herbert Hoover. Mel Ayton has uncovered these episodes, including an attempt to assassinate President Hayes during his inauguration ceremony, an attempt to shoot Benjamin Harrison on the streets of Washington, an assassination attempt on President Roosevelt at the White House, and many other incidents that have never been reported or have been covered up. Ayton also recounts the stories of Secret Service agents and bodyguards from each administration who put their lives in danger to protect the commander in chief. Plotting to Kill the President demonstrates the unsettling truth that even while the nation sleeps, those who would kill the president are often hard at work devising new schemes.

It's the inevitable meeting of the sourpusses! Garfield, the reigning cynical cat of newspapers and TV crosses paths with Grumpy Cat, the internet sensation whose scowl endeared herself to the world. Who's the most sarcastic? Well, he likes lasagna and not much else...and she doesn't even like lasagna. Can these two inhabit the same comic book mini-series, let alone the same planet? You'll find out in a trio of issues written by Mark Evanier and illustrated by Steve Uy. We'd say it's the cat's meow but neither of these cats meows.

This volume presents new methods and applications in longitudinal data estimation methodology in applied economics. Featuring selected papers from the 2020 the International Conference on Applied Economics (ICOAE 2020) held virtually due to the corona virus pandemic, this book examines interdisciplinary topics such as financial economics, international economics, agricultural economics, ma Garfield’s greatest contribution to science was the Science Citation Index (SCI). It is a system that used to chart connections between pieces of scientific literature. It is not only an intellectual achievement, but also an information-engineering marvel covering millions of records, from numerous subject fields and communicated over worldwide networks. These databases became the foundation of accessible electronically via the Web of Science. Garfield enabled information retrieval to scale up basically creating the entire information science field, as we know it today. His life and work will surely inspire generations of scientists in advancing the frontiers of human knowledge. This is Informatics Studies 4(2), which is Eugene Garfield Memorial Issue. It gives a bird’s eye view of Garfield’s life in print for the first time presenting his views on impact of information systems in scientific research, NGOs, the future of Open Access, current research, and Big science which can guide academic administrators, science policy makers in governments and scientists.

"A comprehensive textbook consisting of both historical and contemporary information and data about American public policy. The format and approach of the text are ideal for undergraduate students because they provide concrete examples of public policy in a way that relates to everyday life." —Linda Trautman, Ohio University Public Policy: A Concise Introduction is a student-friendly primer t condenses early chapters on theory and the policy-making process, allowing students to take up key policy challenges—such as immigration, education, and health care—much earlier in the semester. Structured chapter layouts of substantive policy areas allow instructors to supplement with their own examples seamlessly. The book’s emphasis on policy choices asks students to look beyond sim

the complexities inherent in real-world problem solving. Not every student starts out engaged in public policy, so place your students—both majors and non-majors alike—in the driver’s seat by fostering their analytical skills early, and spend the rest of the semester discussing policy issues, examining data, and debating current policy examples that matter most to them. Give your students the S

array of free tools and resources for review, study, and further exploration, keeping both instructors and students on the cutting edge of teaching and learning. Learn more at edge.sagepub.com/rinfret.

Smart City Emergence: Cases from around the World analyzes how smart cities are currently being conceptualized and implemented, examining the theoretical underpinnings and technologies that connect theory with tangible practice achievements. Using numerous cities from different regions around the globe, the book compares how smart cities of different sizes are evolving in different countries and continents. In addition, it examines the challenges cities face as they adopt the smart city concept, separating fact from fiction, with insights from scholars, government officials and vendors currently involved in smart city implementation. Utilizes a sound and systematic research methodology Includes a review of the latest research developments Contains, in each chapter, a brief summary of the case, an illustration of the theoretical context that lies behind the case, the case study itself, and conclusions showing learned outcomes Examines smart cities in relation to climate change, sustainability, natural disasters and community resiliency

Eat, Sleep, and Be Merry—with Garfield! Just as day becomes night, summer becomes fall, and breakfast becomes lunch (with ample time for snacks in between!), Garfield becomes plumper and funnier with every meal he devours and every practical joke he performs. So whether he’s nudging Odie off the coffee table or “doing” lunch with Jon’s goldfish, Garfield’s in it for the fun—and so are we!

This book is an essential guide or foundational toolkit for anyone who is involved in the process of developing, offering or selling any type of product or service. Based on how to surf on the waves of innovation and the principle of “form follows function” (System Architecture), it introduces and connects concepts like Market Understanding, Design Thinking, Design to Value, Modularization and Agility. It introduces readers to the essence of these main frameworks and provides a toolkit that explains both theoretically and practically when and how to utilize which one. The methods and processes described in this book have all been successfully tested in many industries. They apply in today’s market context of high uncertainty, complexity and turbulence, where innovation and disruption are essential. Readers will find answers to two fundamental questions: How can we implement an innovation process and environment that are conducive to successful product design? And, if our products fail to appeal to customers, how can we achieve a major turn-around with regard to product development? A wealth of examples and case studies help readers to benefit from the authors’ broad professional experience. Further, lessons learned and conceptual summaries provide valuable shortcuts to the methods and tools discussed. For today’s CEOs, enabling innovation is one of THE most complex leadership tasks. But innovation is not about theory and nice buzzwords. It’s about succeeding in the real world. This ‘hands-on’ book connects the dots and introduces the reader to some of the most relevant ideas and pragmatic concepts fitting today’s business reality. Dr. Robert Neuhauser, Executive VP and Global Head People and Leadership Development, Siemens At the most fundamental level this book brings order to chaos. It sets different and highly relevant design approaches into a complementary picture, rather than presenting them as competing ways of solving the same problem. Product designers, managers, consultants, scholars and students will surely have this valuable book within reach on a daily basis. Olivier L. de Weck, Ph.D – MIT Professor of Aeronautics and Astronautics and Engineering Systems, Editor-in-Chief Systems Engineering

Campaign Crossroads looks back over the varied, sometimes important, sometimes irrelevant, but always interesting presidential campaign cycles in Indiana’s history. By taking in the influences of technology, transportation and communication itself, we see an evolution in the political process that is not only altogether Hoosier, but also altogether American in its quality and importance. Using a narrative approach with a mix of primary and secondary sources, the work examines not only the rhetoric of presidents and presidential hopefuls, but also the nature of campaigns and their impact on Indiana communities. While Indiana enjoyed the position of being a battleground state for the better part of a century from the 1870s until the 1960s, it has also been ignored, dismissed, and has on occasion created unexpected political drama.

ECPA 2020 Christian Book Award Finalist! You wouldn't believe it, but . . . James Earl Jones, the voice of Darth Vader, grew up mute. Michael Jordan was cut from his high school basketball team. Albert Einstein was bullied mercilessly in school. Beethoven's mom almost aborted him. Life takes the strangest sharp turns—and sometimes, U-turns. Robert Petersen—popular speaker, storyteller, and author—has been a student for his entire life of what God is teaching us through those real-life U-turns. In this book, he compiles 365 amazing stories that teach lessons you won't easily forget. Each entry is written in the rest-of-the-story style popularized by Paul Harvey. With The One Year Book of Amazing Stories, you'll marvel at how God has used the lives of these ordinary people to change the course of human history.

Voys for 1902- include decisions of the District of Columbia Court of Appeals and various other courts of the District of Columbia.

While many books explore specific issues such as gun violence, arson, murder, and crime prevention, this encyclopedia serves as a one-stop resource for exploring the history, societal factors, and current dimensions of violence in America in all its forms. This encyclopedia explores violence in the United States, from the nation's founding to modern-day trends, laws, viewpoints, and media depictions. Providing a nuanced lens through which to think about violence in America, including its underlying causes, its iterations, and possible solutions, this work offers broad and authoritative coverage that will be immensely helpful to users ranging from high school and undergraduate students to professionals in law enforcement and school administration. In addition to detailed and evoked summaries of the key events and issues relating to violence in America, contributors highlight important events, political debates, legal perspectives, modern dimensions, and critical approaches. This encyclopedia also features excerpts from such important primary source documents as legal rulings, presidential speeches, and congressional testimony from scholars and activists on aspects of violence in America. Together, these documents provide important insights into past and present patterns of violent crime in the United States, as well as proposed solutions to those problems. Addresses all aspects of violence in American society, past and present, including societal factors and legal, political, and law enforcement responses Includes lists of research resources for additional study Highlights insightful primary documents of key events and patterns of violence in America Features contributions from prominent scholars in a wide range of fields related to crime, violence, and law

Disrupting Hate in Education aims to identify and respond to the ideological forms of hate and fear that are present in schools, which echo larger nativist and populist agendas. Contributions to this volume are international in scope, providing powerful examples from US schools and communities, examining anti-extremism work in the UK, the “saffronation” of schools in India, struggles to re-orient the villainization of teachers in Brazil, and more. Written by a dynamic group of activist educators and critical researchers, chapters demonstrate how conservative mobilizations around collective identities gain momentum, and how these mobilizations can be interrupted. Out of these interruptions come new opportunities to practice a critically democratic education that hinges upon risk-taking, deep dialogue, and creating a space for common dignity.

Music Education for Social Change: Constructing an Activist Music Education develops an activist music education rooted in principles of social justice and anti-oppression. Based on the interviews of 20 activist-musicians across the United States and Canada, the book explores the common themes, perceptions, and philosophies among them, positioning these activist-musicians as catalysts for change in music education while raising the question: amidst racism and violence targeted at people who embody difference, how can music education contribute to changing the social climate? Music has long played a role in activism and resistance. By drawing upon this rich tradition, educators can position activist music education as part of a long-term response to events, as a crucial initiative to respond to ongoing oppression, and as an opportunity for youth to develop collective, expressive, and critical thinking skills. This emergent activist music education—like activism pushing toward social change—focus

on bringing people together, expressing experiences, and identifying (and challenging) oppressions. Grounded in practice with examples integrated throughout the text, Music Education for Social Change is an imperative and urgent consideration of what may be possible through music and music education.

Student Activism in the Academy: Its Struggles and Promise is a wide-ranging, provocative survey of student activism in America’s colleges and universities that critically analyzes the contentious problems and progress of a movement that has stirred public reaction in and out of academe. Its fundamental purpose is to engage diverse publics in both reasoned and passionate reflection and soul searching on vital issues that surround campus protest, including: strategies for student activism the role of social media and technology legal questions on campus speech the dilemmas of political correctness generational differences among student activists and various forms of

student protest related to race, class, gender, and disabilities. Administrators, faculty, students, and student life personnel in higher education—indeed, all those interested in today’s colleges and universities—will want to participate in the timely and productive dialogue within these pages.

Jean Negulesco worked in Hollywood first as an art director, then as a second unit director. He was later hired as a director. He achieved his greatest success, with Warner Brothers and 20th Century-Fox. This book—the first on Negulesco since his 1984 autobiography—covers his extraordinary life and career, with extensive analysis of his films”--
