passed four Hindu Law Acts to reform and codify Hindu family law. Scholars have understood these acts as a response to growing concern about women's rights but, in a powerful re-reading of their history, this book traces the origins of the Hindu law reform project to changes in the political-economy of late colonial rule. *The Hindu Family and the Emergence of Modern India* considers how questions regarding family structure, property rights and gender relations contributed to the development of representative politics, and how, in solving these questions, India's secular and state

power structures were consequently drawn into a complex and unique relationship with Hindu law. In this comprehensive and illuminating resource for scholars and students, Newbiggin demonstrates the significance of gender and economy to the history of twentieth-century democratic government, as it emerged in India and beyond.

twenty empirical studies, the book details the emergence of a new corporate legal sector in India including large and sophisticated law firms and in-house legal departments, as well as legal process outsourcing companies. As the book's authors document, this new corporate legal sector is reshaping other parts of the Indian legal profession, including legal education, the development of pro bono and corporate social responsibility, the regulation of legal services, and gender, communal, and professional hierarchies with the bar. Taken as a whole, the book will be of interest to academics, lawyers, and policymakers interested in the critical role that a rapidly globalizing legal profession is

This book is devoted to an examination of the legal status of

government merchant ships while on the high seas or in the waters of foreign states in time of peace. The object of this examination is to ascertain whether there is any rule of international law which accords such a ship a higher status than that of private merchant ships. Whether government merchant ships, unlike private ships, are entitled to certain immunities from the jurisdiction of foreign states is the question that we have set out to answer in this book. A discussion of the rules concerning the nationality of such a ship or the jurisdiction of the flag state over her does not find a place in this work. A government merchant ship may be defined as a merchant ship owned or operated by a state.

Immunity of a ship here means the exemption of a government ship from the jurisdiction of any state other than the flag state. This term also connotes the immunity of the flag state from the jurisdiction of the tribunals of foreign states in respect of proceedings connected with such a ship.

Immunity of persons means the exemption of persons in the service of a government ship, or other persons on board her, from the jurisdiction of any state other than the flag state.

This rare comprehensive critique of criminology in India brings together widely respected activists, advocates, bureaucrats, scholars and practitioners who share their concerns about the Indian criminal justice system through

an interdisciplinary lens and discuss the need to entrench human rights in Indian polity. It is a significant step towards mapping the ways in which interdisciplinary research and human rights activism might inform legal praxis more effectively and holistically. *Challenging the Rule(s) of Law: Colonialism, Criminology and Human Rights in India* contests unproblematic assumptions of the rule of law and opens out avenues for a renewed and radical study of criminal law in the country. The collection looks at the problem of criminal law from the early colonial period to the present, examining the problem of overt violence by state actors and their compliance with dominant private actors. Excerpt from The Government of India: Being a Digest of the Statute Law Relating Thereto; With Historical Introduction and Explanatory Matter The fourth chapter, which deals with the application of English law to the natives of India, is based on a paper read at a meeting of the Society of Comparative Legislation. It points to a field in which useful work may be done by students of comparative jurisprudence. In the fifth chapter I have tried to explain and illustrate the legal relations between the Government of British India and the Governments of

the Native States by comparison with the extra-territorial powers exercised by British authorities in other parts of the world, such as the countries where there is consular jurisdiction, and in particular the modern protectorates. The subject is interesting and important, but full of difficulty. The rules and usages which govern the relation between States and peoples of different degrees and kinds of civilization are in a state of constant flux and rapid growth, and on many topics dealt with in this chapter it would be unsafe to lay down general propositions without qualifying and guarding words. There are quicksands

at every step. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Law of the Indian Constitution, Being a Legal Interpretation of the Government of India Act, 1935 (26 Geo. V. C. 2) and a Study of the Structure of the Indian Constitution, Before and After the Federa Refinery explosions. Accounting scandals. Bank meltdowns. All of these catastrophes—and many more—might rightfully be blamed on corporations. In response, advocates have suggested reforms ranging from increased government regulation to corporate codes of conduct to stop corporate abuses. Joshua Barkan writes that these reactions,

which view law as a limit on corporations, misunderstand the role of law in fostering corporate power. In *Corporate Sovereignty*, Barkan argues that corporate power should be rethought as a mode of political sovereignty. Rather than treating the economic power of corporations as a threat to the political sovereignty of states, Barkan shows that the two are ontologically linked. Situating analysis of U.S., British, and international corporate law alongside careful readings in political and social theory, he demonstrates that the Anglo-American corporation and modern political sovereignty are founded in and bound together through a principle

of legally sanctioned immunity from law. The problems that corporate-led globalization present for governments result not from regulatory failures as much as from corporate immunity that is being exported across the globe. For Barkan, there is a paradox in that corporations, which are legal creations, are given such power that they undermine the sovereignty of states. He notes that while the relationship between states and corporations may appear adversarial, it is in fact a kind of doubling in which state sovereignty and corporate power are both conjoined and in conflict. Our refusal to grapple with the peculiar nature of this doubling means that

some of our best efforts to control corporations unwittingly reinvest the sovereign powers they oppose.

This volume establishes a theoretical

framework for exploring the role of host state legal systems (courts and bureaucracies) in mediating relations between foreign investment, civil society and government actors. It then demonstrates the application of that framework in the context of the south Indian city of Bengaluru (formerly Bangalore). Drawing on the 'law-and-community' approach of Roger Cotterrell, the volume identifies three mechanisms through which law might, in theory, ensure that social relations are productive: by

expressing any mutual trust which may hold actors together, by ensuring that actors participate fully in social life and by coordinating the differences that hold actors apart. Empirical data reveals that each of these legal mechanisms is at work in Bengaluru. However, their operation is limited and skewed by the extent to which actors use, abuse and/or avoid them. Furthermore, these legal mechanisms are being eroded as a direct result of the World Bank's 'investment climate' discourse, which privileges the interests

and values of foreign investors over those of other actors.
