the comic strip  
"Robotman." The writings  
collected by Stuart

examine the profound

philosophical issues surrounding the Turing Test as a criterion for intelligence. Alan Turing's idea, originally expressed in a 1950 paper titled

## File Type PDF Holt Math Chapter 12 Test

"Computing Machinery and Intelligence" and published in the journal Mind, proposed an "indistinguishability test" that compared artifact and person.

## File Type PDF Holt Math Chapter 12 Test

Following Descartes's dictum that it is the ability to speak that distinguishes human from beast, Turing proposed to test whether machine and person were

indistinguishable in regard to verbal ability. He was not, as is often assumed, answering the question "Can machines think?" but proposing a more

concrete way to ask it. Turing's proposed thought experiment encapsulates the issues that the writings in The Turing Test define and discuss. The first

final section opens with responses to Turing's paper published in Mind soon after it first appeared. The bulk of this section, however, consists of papers from

a broad spectrum of scholars in the field that directly address the issue of the Turing Test as a test for intelligence.

At a summer tea party in

differently than that of milk poured into tea. Her notion is shouted down by the scientific minds of the group. But one guest, by the name Ronald Aylmer Fisher,

proposes to scientifically test the lady's hypothesis. There was no better person to conduct such a test. For Fisher had brought to the field of statistics

an emphasis on controlling the methods for obtaining data and the importance of interpretation. He knew that how the data was gathered and applied was
