Medieval Spain is brilliantly recreated, in all its variety and richness, in this comprehensive survey. Likely to become the standard work in English, the book treats the entire Iberian Peninsula and all the people who inhabited it, from the coming of the Visigoths in the fifth century to the reign of Ferdinand and Isabella. Integrating a wealth of information about the diverse peoples, institutions, religions, and customs that flourished in the states that are now Spain and Portugal, Joseph F. O'Callaghan divides his story into five compact historical periods and discusses political, social, economic, and cultural developments in each period. By treating states together, he is able to put into proper perspective the relationships among them, their similarities and differences, and the continuity of development from one period to the next. He gives proper attention to Spain's contacts with the rest of the medieval world, but his main concern is with the events and institutions on the peninsula itself. Illustrations, genealogical charts, maps, and an extensive bibliography round out a book that will be welcomed by scholars and student of Spanish and Portuguese history and literature, as well as by medievalists, as the fullest account to date of Spanish history in the Middle Ages.

The study of Islamic law can be a forbidding prospect for those entering the field for the first time. Wael Hallaq, a leading scholar and practitioner of Islamic law, guides students through the intricacies of the subject in this absorbing introduction. The first half of the book is devoted to a discussion of Islamic law in its pre-modern natural habitat. The second part explains how the law was transformed and ultimately dismantled during the colonial period. In the final chapters, the author charts recent developments and the struggles of the Islamists to negotiate changes which have seen the law emerge as a primarily textual entity focused on fixed punishments and ritual requirements. The book, which includes a chronology, a glossary of key terms, and lists of further reading, will be the first stop for those who wish to understand the fundamentals of Islamic law, its practices and history.

This volume provides a comprehensive survey of the contemporary study of Islamic law and a critical analysis of its deficiencies. Written by outstanding senior and emerging scholars in their fields, it offers an innovative historiographical examination of the field of Islamic law and an ideal introduction to key personalities and concepts. While capturing the state of contemporary Islamic legal studies by chronicling how far the field has come, the Handbook also explains why certain debates recur and indicates fundamental gaps in our knowledge. Each chapter presents bold new avenues for research and will help readers appreciate the contested nature of key concepts and topics in Islamic law. This Handbook will be a major reference work for scholars and students of Islam and Islamic law for years to come.

Reprint of first and only edition. Originally published: Washington, D.C.: Middle East Institute, 1955. xviii, 395 pp. A committee from The Middle East Institute, led by George Camp Keiser, Chairman of the Board of Governors, enlisted outstanding authorities on Middle East law to contribute chapters on specific topics. This book moves from the alphabet and pronunciation through morphology and word classes to a detailed analysis of sentence structures and semantic features such as aspect, tense, speech styles and negation. In this context, a lone actor, or 'lone wolf', is someone who individually prepares or commits violent acts in support of an ideology, group or movement, but who is acting outside of the command structure and without the assistance of any group. Up to now, these individual acts have been seen as almost impossible to forecast, but it is nevertheless important to develop a responsible security policy which takes them into account and incorporates planning for counteraction, prevention and response. This book presents papers, written by leading experts in the field, which reflect the subjects presented at the workshop 'Lone Actors – An Emerging Security Threat', part of the NATO Science for Peace and Security Programme, held in Jerusalem in November 2014. The papers are divided into five sections: the threat of lone actor terrorism; case studies; countering and responding to the threat; legal and ethical aspects; and foresight and policy aspects. The insights, information and recommendations shared in this book will be of interest to all those involved in developing a more efficient response policy to this emerging threat.

The work of Seattle-based architect Tom Kundig has been called both raw and refined, as well as super-crafted and warm. Kundig's projects, especially his houses, uniquely combine these two seemingly disparate sets of characteristics to produce some of the most inventive structures found in the architecture world today. Kundig's internationally acclaimed work is inspired by both the industrial structures with which he grew up in the Pacific Northwest and the vibrant craft cultures that are fostered there. His buildings uniquely meld industrial sensibilities and materials such as Cor-ten steel and concrete with an intuitive understanding of scale. As Kundig states, "The idea is inseparable from the fabrication, inseparable from the materials used." Tom Kundig: Houses presents five projects in depth, from their early sketches to their final lovingly wrought, intimate details. Kundig's houses reflect a sustained and active collaborative process between designer, craftsmen, and owners, resulting in houses that bring to life the architect's intentions, the materials used, and lines of unforgettable beauty. Young readers will love to feel the different textures and hear the truck sounds in this interactive, sturdy board book designed for children ages 3 and up. The main objective of this book is to present the on-going process of European integration via a comprehensive analysis of the institutional dynamics of, and politics linked with, the emerging migration law and policy of the European Union. More specifically, it presents the historical evolution, the main institutional legislative and policy steps, the position of, and interactions among, the different actors, and the factors impeding the formation of a common policy at EU level. On this basis a critical analysis is provided of the main institutional problems, the current policy framework, the overarching rationale as well as of the content and quality of the nascent EU migration law. The book is divided into three parts. The first two parts provide a comprehensive study of the institutional framework and the substantive EC/EU law respectively. The third and final part provides a more general analysis of the policy-making process. Since the major achievements in the field of migration are recent, the book focuses to a great extent on the post-Amsterdam era. However, for reasons of coherence and in order to better evaluate recent developments, a concise overview of the origins of this policy is provided. Moreover, special emphasis is placed on the Schengen acquis, since its mark on European affairs has been and remains pronounced. Overall the attempt has been to provide an account, which is up to date with extensive historical references and combines both an academic and practical perspective to the legal and political issues involved. The approach based on the above elements will contribute to a new understanding of the main aspects of EU migration law and its policy ramifications and will be of use to both academics and practitioners alike.

Korean: A Comprehensive Grammar is a reference to Korean grammar, and presents a thorough overview of the language, concentrating on the real patterns of use in modern Korean. The book moves from the alphabet and pronunciation through morphology and word classes to a detailed analysis of sentence structures and semantic features such as aspect, tense, speech styles and negation. Updated and revised, this new edition includes lively descriptions of Korean grammar, taking into account the latest research in Korean linguistics. More lower-frequency grammar patterns have been added, and extra examples have been included throughout the text. The unrivalled depth and range of this updated edition of Korean: A Comprehensive Grammar makes it an essential reference source on the Korean language.

This is the leading textbook for medical histology and microscopic anatomy courses. It features an updated description of the structure and function of cells and the function and specialization of the four tissue groups: epithelial, connective, adipose, and nerve. Chapters on the cytoplasm and cell nucleus are updated to include the most recent discoveries on cell biology. It also describes the cellular function of each organ. Clinical correlations are highlighted throughout the book.

This book provides an introduction to quantum theory primarily for students of mathematics. Although the approach is mainly traditional the discussion exploits ideas of linear algebra, and points out some of the mathematical subtleties of the theory. Amongst the less traditional topics are Bell's inequalities, coherent and squeezed states, and introductions to group representation theory. Later chapters discuss relativistic wave equations and elementary particle symmetries from a group theoretical standpoint rather than the customary Lie algebraic approach. This book is intended for the later years of an undergraduate course or for graduates. It assumes a knowledge of basic linear algebra and elementary group theory, though for convenience these are also summarized in an appendix.

While at the zoo Pat the Bunny pets the animals, from a wrinkly elephant to a feathery parrot. On board pages. Recent analyses reveal that the vast majority of jihadists come from or have some connections with specific areas or districts within different states. They can be labelled as local/regional "hotbeds" of extremism. Molenbeek in Belgium, Gornje Maoče and Ošve in Bosnia-Herzegovina, Minneapolis in the US, Kasserine and Ben Guerdane in Tunisia, Sirte and Derna in Libya, Sinai in Egypt, Pankisi Valley and Dagestan in the Caucasus: each area has unique characteristics that lead to "exporting" fighters or creating new IS-controlled zones. Starting from the debate on the origin and nature of jihadist militancy that is dividing the most important scholars of Islam, this report outlines a broad spectrum of radicalization factors leading to the emergence of jihadist hotbeds, such as poverty, unemployment, lack of job prospects, juvenile delinquency, trafficking and smuggling, socio-political, economic and physical marginalization, the role of Salafist ideology as well as the influence of brotherhood networks. All these elements have been frequently highlighted as factors or triggers that could contribute to explaining dynamics of radicalization leading to active violent militancy under the ideals of jihadism.

Experience and Education is the best concise statement on education ever published by John Dewey, the man acknowledged to be the pre-eminent educational theorist of the twentieth century. Written more than two decades after Democracy and Education (Dewey's most comprehensive statement of his position in educational philosophy), this book demonstrates how Dewey reformulated his ideas as a result of his intervening experience with the progressive schools and in the light of the criticisms his theories had received. Analyzing both "traditional" and "progressive" education, Dr. Dewey here insists that neither the old nor the new education is adequate and that each is miseducative because neither of them applies the principles of a carefully developed philosophy of experience. Many pages of this volume illustrate Dr. Dewey's ideas for a philosophy of experience and its relation to education. He particularly urges that all teachers and educators looking for a new movement in education should think in terms of the deeped and larger issues of education rather than in terms of some divisive "ism" about education, even such an "ism" as "progressivism." His philosophy, here expressed in its most essential, most readable form, predicates an American educational system that respects all sources of experience, on that offers a true learning situation that is both historical and social, both orderly and dynamic.

This book discusses the bioremediation of both solid and liquid waste, including regional solutions for India as well as globally relevant applications. The topics covered include pollutant reduction through composting, solutions for petroleum refinery waste, use of microorganisms in the bioremediation of industrial waste and toxicity reduction, microbial fuel cells, and microbial depolymerisation. The book also explores the biosorption of metals and the bioremediation of leachates, especially with regard to soil and groundwater remediation. It is a valuable resource for researchers, professionals, and policy makers alike.

In this pioneering work Siraj Sait and Hilary Lim address Islamic property and land rights, drawing on a range of socio-historical, classical and contemporary resources. They address the significance of Islamic theories of property and Islamic land tenure regimes on the 'webs of tenure' prevalent in the Muslim societies. They consider the possibility of using Islamic legal and human rights systems for the development of inclusive, pro-poor approaches to land rights. They also focus on Muslim women's rights to property and inheritance systems. Engaging with institutions such as the Islamic endowment (waqf) and principles of Islamic microfinance, they test the workability of 'authentic' Islamic proposals. Located in human rights as well as Islamic debates, this study offers a well researched and constructive appraisal of property and land rights in the Muslim world.

**Do you have unanswered questions about God and the Bible? Have you ever had trouble understanding what the Word says when you read it? If so, Derek Prince has developed an amazing help for you. In this updated and expanded edition of his Bible study course, you will find answers to questions such as: How can I have victory over sin? What is God's plan for healing our bodies? How can I know I will go to heaven when I die? What is God's plan for prosperity? How can I receive answers to my prayers? What does the future hold for me? Even if you have never read the Bible before, you will find this systematic study guide easy to use and helpful. If you have been a believer for many years, you will find a new ease in conversing with God, enjoying fellowship with other Christians, receiving guidance, and witnessing and winning souls. Through this study, you will experience important changes in your life and discover an intimacy with God that you may have never known before.**

Seventeen year old, Tianna Harper, never expected to leave Georgia. But after her mother lands a new job overseas, she is forced to leave her small rural town and move up North with her crazy, no-holds-barred, aunt in Brooklyn. Fast paced. Full of life. New York is nothing like back home. And with the help of her cousin, Lavina, Tianna learns to adjust to the new way of life in the busy city. However, everything as she knows it changes, when she meets Damien, a smooth talking, baby faced brother from around the way, who manages to turn her life completely upside down. A coming of age story, compellingly painted with the rich essence of 1970's through early 90's New York, Brown Silk shares the gripping tale of a young girl's journey to womanhood, as she discovers the poignant beauty of love, pain, and self-acceptance.

In this enlightening book, the third in the success series, Dag Heward-Mills writes about the cardinal features of Solomon's success and how it is applicable to our lives today. Also remember that wealth is neutral which means it can be used for good or bad. In the remaining part of the book the author studies the principles Solomon used to take him to these heights of success. Solomon obeyed his father's instructions, he knew the secret of building the temple of God and that it is not possible to build anything unless you have peace and stability. The secret of righteousness lies in asking God to help you discern between good and bad. The last principle is to use your mind. If you become a Christian it doesn't mean you should stop using your mind. God expects you to use your eyes and mind to make decisions. Jesus is not only power to us. He is power and wisdom. When you effectively combine power and wisdom, you will begin to experience Solomonic success.

The Oxford Handbook of Islamic Law

Property and Human Rights in the Muslim World

Islamic law (the Shari'a) and its application is a central issue in contemporary Islamic politics and culture. Starting from modern concerns, this book examines the origins and evolution of the Shari'a and the corpus of texts, concepts and practices in which it has been enshrined. The central paradox in this history is one of power: the Shari'a is jurist's law, theoretically derived from sacred sources, yet dependent for its institution and application on rulers, with their own agendas and priorities. Sami Zubaida here considers key historical episodes of political accommodations and contests.
