According to the people of the Mueda plateau in northern Mozambique, sorcerers remake the world by asserting the authority of their own imaginative visions of it. While conducting research among these Muedans, anthropologist Harry G. West made a revealing discovery—for many of them, West's efforts to elaborate an ethnographic vision of their world was itself a form of sorcery. In *Ethnographic Sorcery*, West explores the fascinating issues provoked by this equation. A key theme of West's research into sorcery is that one sorcerer's claims can be challenged or reversed by other sorcerers. After West's attempt to construct a metaphorical interpretation of Muedan assertions that the lions prowling their villages are fabricated by sorcerers is disputed by his Muedan research collaborators, West realized that ethnography and sorcery indeed have much in common. Rather than abandoning ethnography, West draws inspiration from this connection, arguing that anthropologists, along with the people they study, can scarcely avoid interpreting the world they inhabit, and that we are all, inescapably, ethnographic sorcerers.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

In Emancipation's Daughters, Riché Richardson examines iconic black women leaders who have contested

racial stereotypes and constructed new national narratives of black womanhood in the United States. Drawing on literary texts and cultural representations, Richardson shows how five emblematic black women—Mary McLeod Bethune, Rosa Parks, Condoleezza Rice, Michelle Obama, and Beyoncé—have challenged white-centered definitions of American identity. By using the rhetoric of motherhood and focusing on families and children, these leaders have defied racist images of black women, such as the mammy or the welfare queen, and rewritten scripts of femininity designed to exclude black women from civic participation. Richardson shows that these women's status as national icons was central to reconstructing black womanhood in ways that moved beyond dominant stereotypes. However, these formulations are often premised on heteronormativity and exclude black queer and trans women. Throughout *Emancipation's Daughters*, Richardson reveals new possibilities for inclusive models of blackness, national femininity, and democracy.

This book constitutes the revised selected papers from the 13th International Conference on Risks and Security of Internet and Systems, CRiSIS 2018, held in Arcachon, France, in October 2018. The 12 full papers and 6 short papers presented in this volume were carefully reviewed and selected from 34 submissions. They cover diverse research themes that range from classic topics, such as vulnerability analysis and classification; apps security; access control and filtering; cloud security; cyber-insurance and cyber threat intelligence; human-centric security and trust; and risk analysis.

This shorter version of the best-selling WORLDS OF MUSIC provides much of the authoritative coverage of the comprehensive version in a format that's accessible to students without any background or training in music.

Using a case-study approach, the text presents in-depth explorations of music of several cultures from around the world. The authors, all ethnomusicologists working in their fields of expertise, base their discussions of music-cultures on their own fieldwork, and give students a true sense of both the music and culture that created it. General editor, Jeff Todd Titon, has written the text's opening chapter that introduces students to ethnomusicology and relates each chapter's music heard on the accompanying CDs to the fundamentals of music in a worldwide context. The text concludes with a chapter that invites students to participate by undertaking a fieldwork research project that increases a student's understanding of music in daily life. The supplementary three-CD set works hand in hand with the authors' prose, providing students with access to a wide range of music-cultures and include authentic recordings from the authors' fieldwork. Leading off is the long-standing jewel in the WORLDS OF MUSIC crown -- James Koetting's magnificent recording of postal workers canceling stamps at the University of Ghana post office. A Western-sounding hymn tune performed against African rhythms, this piece, more than any other, lets the student hear contrasting music-cultures. This open access book explores the global challenges and experiences related to digital entrepreneurial activities, using carefully selected examples from leading companies and economies that shape world business today and tomorrow. Digital entrepreneurship and the companies steering it have an enormous global impact; they promise to transform the business world and change the way we communicate with each other. These companies use digitalization and artificial intelligence to enhance the quality of decisions and augment their business and customer operations. This book demonstrates how cloud services are continuing to evolve; how cryptocurrencies are traded in the banking industry; how platforms are created to commercialize business, and how, taken together, these developments provide new opportunities in the digitalized era. Further, it discusses a wide range of digital factors changing the way businesses operate, including artificial intelligence, chatbots, voice search, augmented and virtual reality, as well as cyber threats and data privacy management. “Digitalization mirrors the Industrial Revolution’s impact. This book provides a complement of perspectives on the opportunities emanating from such a deep seated change in our economy. It is a comprehensive collection of thought leadership mapped into a very useful framework. Scholars, digital entrepreneurs and practitioners will benefit from this timely work.” Gina O’Connor, Professor of Innovation Management at Babson College, USA “This book defines and delineates the requirements for companies to enable their businesses to succeed in a post-COVID19 world. This book deftly examines how to accomplish and achieve digital entrepreneurship by leveraging cloud computing, AI, IoT and other critical technologies. This is truly a unique “must-read” book because it goes beyond theory and provides practical examples.” Charlie Isaacs, CTO of Customer Connection at Salesforce.com, USA "This book provides digital entrepreneurs useful guidance identifying, validating and building their venture. The international authors developed new perspectives on digital entrepreneurship that can support to create impact ventures.” Felix Staeritz, CEO FoundersLane, Member of the World Economic Forum Digital Leaders Board and bestselling author of FightBack, Germany

"Blackstone has proved that finding superior leaders produces superior results. Dave Ulrich has brought this thinking to a new level at Blackstone. Every private equity investor and senior manager must read this book." --James Quella, Senior Operating Partner, The Blackstone Group According to studies, we all work for the same thing--and it's not just money. It's meaning. Through our work, we seek a sense of purpose, contribution, connection, value, and hope. Digging down to the meaning of work taps our resilience in hard times and our passion in good times. That's the simple but profound premise behind this groundbreaking book by renowned management expert Dave Ulrich and psychologist Wendy Ulrich. They've talked to thousands of people--from rank-and-file workers to clients and customers to top-level executives--and synthesized major disciplines to identify the "why" behind our most successful experiences. Using the model of the "abundant organization," they provide you with the "how" to create meaning and value in your own workplace. Learn how to: Ask the seven questions that drive abundance Understand the needs of your customers and staff Personalize the work to motivate your employees Build and grow your business in any economy By following the Ulrichs' step-by-step guidelines, you will set off a chain reaction of positive and enduring effects. Employees who find meaning in their work are more competent, committed, and eager to contribute—and their contribution will result in increased customer commitment, which delivers a winning performance on the bottom line. The Why of Work includes targeted checklists, questionnaires, and other useful tools to help you turn aspirations into action. Using the proven principles of abundance, you can coordinate your needs with those of your employers, your employees, and your customers--and create a vision that resonates for years to come. When you understand why we work, you know how to succeed.

This book is a comprehensive, in-depth, and up-to-date resource on eye examination that will be of great practical value for ophthalmologists and optometrists. The aim is to guide the practitioner through the diagnostic process and the implications for management of the ocular patient, and in so doing to demonstrate that it is possible to reach appropriate decisions on the basis of eye examination. Every year, existing ocular equipment is being upgraded and new diagnostic equipment is appearing on the market. This book reflects recent progress in upgrading by providing information and guidance on the latest innovations in ocular examination and eye testing while also highlighting the continuing important role of the traditional eye test. The coverage accordingly ranges from such long-established techniques as ophthalmoscopy, tonometry, and slit lamp examination through to the latest advances in OCT technologies, digital fundus photography, confocal scanning laser ophthalmoscopy, ocular ultrasound, and angiography. The authors hope that the book will assist all practitioners who perform ophthalmologic examinations.

NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the *New York Times* bestseller *Guitar Zero* At thirty years

old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

David Morrow and Anthony Weston build on Weston's acclaimed A Rulebook for Arguments to offer a complete textbook for a course in critical thinking or informal logic. Features of the book include: Homework exercises adapted from a wide range of actual arguments from newspapers, philosophical texts, literature, movies, YouTube videos, and other sources. Practical advice to help students succeed when applying the Rulebook's rules. Suggestions for further practice that outline activities students can do by themselves or with classmates to improve their critical thinking skills. Detailed instructions for in-class activities and take-home assignments designed to engage students in critical thinking. An appendix on mapping arguments, a topic not included in the Rulebook, that introduces students to this vital skill in evaluating or constructing complex and multi-step arguments. Model responses to odd-numbered exercises, including commentaries on the strengths and weaknesses of selected model responses as well as further discussion of some of the substantive intellectual, philosophical, and ethical issues raised by the exercises. The third edition of Workbook contains the entire text of the recent fifth edition of the Rulebook, supplementing this core text with extensive further explanations and exercises. Updated and improved homework exercises ensure that the examples continue to resonate with today's students. Roughly one-third of the exercises have been replaced with updated or improved examples. A new chapter on engaging constructively in public debates—including five new sets of exercises—trains students to engage respectfully and constructively on controversial topics, an increasingly important skill in our hyper-partisan age. Three new critical thinking activities offer further opportunities to practice constructive dialogue.

Earth Day celebrates our beautiful planet and calls us to act on its behalf. Some people spend the day planting flowers or trees.
