Habitations have been fashioned from unfired earth since antiquity, and with the technique continuing to be widely employed in Britain until the nineteenth century there is a tremendous range of historical examples available for viewing and study. They are to be found across the islands— though known by various names, such as East Anglia's 'clay lump' and Buckinghamshire's 'witchert' —and their ubiquity means that an appreciation of these often-overlooked buildings can greatly contribute to the general pleasures of travel in Britain. John McCann here describes the various processes of building with earth, examines the regional patterns and terminologies, and illustrates standing buildings of clay and cob in many parts of Britain.

Whether you're looking for something to do on a rainy day or making a personalized gift for a friend, crafts are a great way to pass the time. They also provide an opportunity to learn how to draw meaning from technical texts. The activities in this book push readers to read for comprehension, use information gained from the text and illustrations to follow step-by-step directions, determine relationships among steps in a technical process, and build the skills they need to fold amazing origami creations.

Complete a variety of fun craft projects using colorful tissue paper. Crafters practice reading comprehension as they follow the steps for each project. The easiest crafts are at the beginning, to allow the reader to practice scaffolding their knowledge as they learn the domain-specific vocabulary.

This book includes twenty-five new rubber band loom projects, including bracelets, sports-themed charms, key rings, pendants, and even a working slingshot. New crafters and dedicated fans will enjoy creating the wide variety of projects in this collection, including: Cell phone case Daisy chain bracelet Watch band Octo bracelet Blooming beaded bracelet Sports fan keychain Matching barrettes Pencil topper Rainbow ring Nunchuks Rocker cuff bracelet Snowman ornament And many more!

In 'The Magic Loom' the author, Heather McClelland, invites adults who survived trauma in their childhood to become more aware of their bodies and helps them interweave the narratives and wisdom of both body and mind as they safely explore and make meaning of the past and put it into a text for therapists primarily, teaching with metaphor and case-study. Therapists will discover why and how weaving the body and mind into interpersonal narrative style conversations meets the needs that contemporary scientific research is uncovering. It is the author's hope that as they themselves may find they can identify with the stories of trauma recovery as they unfold and engage with the Magic Loom's conversational style, a translation of the languages of therapy and of science. Neuroscientists inform us that unresolved aspects of early trauma become hidden in somatic memory (van der Kolk, 2006). Memories are not cognitively or narratively retrievable because at the time of the original trauma

impacts on the traumatised child's brain prevented vital neural signals from reaching the brain's higher, sense-making parts (Perry, 1992, 2006). The trauma is remembered, not by her rational mind but by her body. Raising a person's awareness of her body means that key elements are woven together with the full range of narrative therapy approaches that enable her to explore what her mind presents. The body-focus is learning to listen to an added voice and a different suite of narratives. She is helping to make explicit and visible to the survivor what is implicit and hidden. It's as if the person's body gives her back her voice and her mind. Body-focused narrative therapy owes its transformation to the synthesis of a range of somatic and narrative approaches.

The Great Recession has shuffled Clay Jannon out of his life as a web-design drone, and serendipity, sheer curiosity and the ability to connect the dots like a monkey have landed him a new gig working the night shift at Mr. Penumbra's 24-Hour Bookstore. But Clay begins to realize that this store is more curious than its name suggests. There are only a few customers, but they come in repeatedly and never seem to actually buy anything. Instead, they "check out" impossibly obscure volumes from strange corners of the store, all according to some elaborate, long-standing arrangement with Mr. Penumbra. The store must be a front for something larger, Clay concludes, and soon he has embarked on a complex analysis of the customer's behavior and roped his friends into helping him figure out just what's going on. But once they take their findings to Mr. Penumbra, they discover a world far beyond the walls of the bookstore. Evoking both the fairy-tale charm of Haruki Murakami and the enthusiastic novel-of-ideas wizardry of Stephen King, Stephenson or Umberto Eco, Mr. Penumbra's 24-Hour Bookstore is exactly what it sounds like—an establishment you have to enter and never leave.

This stunning fantasy inspired by Chinese folklore is a companion novel to *Starry River of the Sky* and the New York Times bestselling author's 2019 Award finalist *When the Sea Turned to Silver*. In the valley of Fruitless Mountain, a young girl named Minli lives in a ramshackle hut with her father. In the evenings, her father regales her with old folktales of the Jade Dragon and the Old Man on the Moon, who knows the answers to all her questions. Inspired by these stories, Minli sets off on an extraordinary journey to find the Old Man on the Moon to ask him how she can change her father's fate. She encounters an assorted cast of characters and magical creatures along the way, including a dragon who accompanies her on her quest for an answer. Grace Lin, author of the beloved *Year of the Dog* and *Year of the Rat* returns with a wondrous story of adventure, faith, and friendship. Crossed with Chinese folklore, *Where the Mountain Meets the Moon* is a timeless story reminiscent of *The Wizard of Oz* and *Kelly Barnhill's* *Drank the Moon*. Her beautiful illustrations, printed in full-color, accompany the text throughout. Once again, she has created a charming world for young readers.

Krakauer's page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." —New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of

*McCandless's short life. Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page.*

Good to Great

When Friendship Followed Me Home

Crafting with Tissue Paper

The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

'Of ways you may speak, but not the Perennial Way; By names you may name, but not the Perennial Name.' The best-loved of all the classical books of China and the most universally popular, the *Daodejing* or *Classic of the Way and Life-Force* is a work that defies definition. It encapsulates the main tenets of Daoism, and upholds a way of being as well as a philosophy and a religion. The dominant image is of the Way, the mysterious path through the whole cosmos modelled on the great Silver River or Milky Way that traverses the heavens. A life-giving stream, the Way gives rise to all things and holds them in her motherly embrace. It enables the individual, and society as a whole, to harmonize the disparate demands of daily life and achieve a more profound level of understanding. This new translation draws on the latest archaeological finds and brings out the word play and poetry of the original. Simple commentary accompanies the text, and the introduction provides further historical and interpretative context.
