The volume aims at providing a comprehensive review of the diverse efforts covering the gap existing between the two main perspectives on the topic of ontologies for multi-agent systems, namely: How ontologies should be modelled and represented in order to be effectively used in agent systems, and on the other hand, what kind of capabilities should be exhibited by an agent in order to make use of ontological knowledge and to perform efficient reasoning with it. The volume collects the most significant papers of the AAMAS 2002 and AAMAS 2003 workshop on ontologies for agent systems, and the EKAW 2002 workshop on ontologies for multi-agent systems.

Take a journey through the world of projects. If you've learned about project management in the classroom then the real world of projects is going to be quite an eye opener. There will be monsters against which you are defenceless. There will be seemingly insurmountable obstacles and your career will hinge on your capacity to deliver in this environment. So what's wrong with the way we teach project management now? How should it be taught? What are we doing wrong? The dollars at stake are in the scale of the national debt. It's time to start looking at project management from a different angle.
