Pharmacology can be difficult. But with the right text, understanding drugs and how they work doesn't have to be! Using easy-to-follow language and engaging learning tools - like Memory Joggers, Clinical Pitfalls, Do Not Confuse, and Drug Alerts - the second edition of Understanding Pharmacology: Essentials for Medication Safety helps readers really understand how drugs work. In addition to the popular critical thinking activities from the first edition, the second edition also includes more chapter review questions, updated content, and a new organization that centers on the different body systems. For students who have a limited background in the sciences and want complete preparation for licensure exams and clinical practice, there is no better choice than Understanding Pharmacology, 2nd Edition! Entire unit reviewing math, weights and measures, and dosage calculation minimizes readers' anxiety and promotes medication safety. Clever, easy-to-recognize margin icons help visual learners remember essential side effects of drugs. Simplified heading structure replaces intimidating terminology (i.e. pharmacokinetics) with simplified language (How These Drugs Work) to increase understanding of concepts. Drug Alert!, Do-Not-Confuse, and Clinical Pitfall boxes highlight important tips for safe medication administration. Memory Jogger boxes help readers remember important drug information. Get Ready for Practice sections at the end of each chapter include key points, chapter review questions, and critical thinking activities to reinforce learning. 10th grade reading level uses straightforward, everyday language to really enhance readers' understanding of pharmacology concepts. Incorporation of adult learning theory features both a simple to complex organization of material along with answers to why readers need to learn something. NEW! Body system organization helps readers better understand drugs that are specific to particular body systems. NEW! More chapter review questions have been added to the text. All review questions are now organized into one of two categories: Test Yourself on the Basics and Test Yourself on Advanced Concepts.

Includes chapter worksheets with answer key; an introduction to the Student Study Tips in the text; an Overview of Dosage Calculations section with practice problems, sample drug labels, and a practice quiz; new in-depth case studies followed by critical thinking questions for each unit of the book; and more.

Emphasizing safe and effective drug administration, Introduction to Clinical Pharmacology, 10th Edition, helps you understand the principles of pharmacology and prevent medication errors. It promotes safety by showing how drugs and drug classes work, so you can understand why drugs are given, as well as the adverse effects and drug interactions that may occur. A thorough nursing process section with each drug class outlines the nurse's role when administering drugs. The updated Get Ready for the Next Generation NCLEX® Examination! feature offers case studies with Next Generation NCLEX-format questions to help you prepare for the new licensure examination. Ideal scope of content and readability for LPN/LVN programs includes basic, need-to-know pharmacology content. Safety Alert boxes highlight important nursing considerations for safe medication administration and monitoring. Lifespan Considerations boxes for children and older adults draw attention to information that would be especially important when giving a specific drug to patients of those age groups. A focus on understanding drug classes helps students understand the actions and uses of drug classes and provides a framework for safe, effective practice as new drugs are introduced to the market. Video clips on medication administration procedures provide students with a visual reference for safe medication administration. Key terms with phonetic pronunciations and text page references help improve students' terminology and language skills before they enter clinical practice. Essential content is highlighted throughout the text, as in all of Elsevier's LPN Threads textbooks, with features such as Top Tips for Safety, Memory Joggers, and Lifespan Considerations boxes. NEW! Get Ready for the Next Generation NCLEX® Examination! section includes key points, review questions, and case studies with Next Generation NCLEX-format questions to prepare students for the new licensure examination. NEW! Reorganized chapters break up lengthy content and more logically present pharmacological content by body system or major disorder. UPDATED! Coverage of newly approved and updated pharmaceutical treatments and drugs prepares students for practice.

*The purpose of this pharmacology study guide is to help nursing graduates work through the vast amount of pharmacological knowledge required for the NCLEX-RN(r) in a systematic and purposeful way. The breadth and detail of the knowledge required of pharmacological concepts often overwhelms new graduates when they are beginning their exam preparation. This guide organizes content using the current NCLEX-RN(r) Test Plan (2016-2019) and provides specific strategies to address pharmacological areas of review which may challenge new graduates in their exam preparation. The guide was created by an experienced undergraduate nurse educator specializing in critical thinking development and application for high stakes exam writing. Many candidates, while studying for the NCLEX-RN(r), often forgo studying pharmacological concepts in the detail required for the exam. Unique to this Pharmacology Guide is a five step algorithm, created by the author, to help graduates approach drug-to-drug interaction questions. This algorithm is designed to help uncover correct answers by using pharmacological principles rather than memorizing drugs that interact with one another. The purpose of the modules in this Pharmacology study guide series are to: * Provide in-depth review of the major drug classes from a systems approach (e.g. respiratory, nervous system etc...) to help increase retention of key concepts and encourage application of pharmacological therapy in the context of disease management. * Summarize important information related to drug therapy and guide graduates to in-depth review of serious adverse events associated with medications. The modules will contain summary tables, review questions and exercises for key concepts. * Direct the reader to important areas for client assessment during drug therapy This is a working pharmacology study guide, so while key information will be presented and organized for review, it is up to you to do the detailed work of content review by answering the questions and exercises in each module The following resources are recommended to use with this pharmacology study guide: 1. Pharmacology textbook. This resource will contain the detailed information pertaining to drug classes and specific nursing considerations related to drug therapy. 2. Drug guide. These resources contain alphabetized drug information and outline pharmacokinetic and pharmacodynamics characteristics of medications. You will find important information related to the absorption, distribution, metabolism and excretions of drugs- as well as protein binding and therapeutic index. 3. An online drug repository if the resources above do not contain the information needed to answer the questions in the guide. Each module contains practice questions using NCLEX-RN(r) formatted questions. It is recommended that you seek additional practice questions from resources that challenge you to go into pharmacological concepts such as serious adverse events and drug-to-drug interactions in detail and test your knowledge specific nursing interventions related to drug therapy. There are a total of 12 working Modules covered in the Pharmacology Study Guide: Module 1: Understanding Drug-to-Drug Interactions Module 2: Drugs Affecting the Respiratory System Module 3: Drugs Affecting the Nervous System Module 4: Drugs Affecting the Gastrointestinal System Module 5: Vascular and Cardiac Medications Module 6: Drugs Affecting the Urinary and Renal System Module 7: Anti-Infective Medications Module 8: Drugs Affecting the Endocrine System Module 9: Antineoplastic Medications Module 10: Medications Given in Mental Health Contexts Module 11: Drugs and the Intra/Ante/Post-Partum Client Module 12: Pain Management and Anesthesia*

Amy Karch has found that students learn best when concepts are built upon each other, growing from simple to complex, building on a foundation of understanding. Organized by body systems, this heavily illustrated book organizes essential nursing pharmacology information into focused, easy-to-learn steps. Building key concepts upon each other, the text gives students a solid foundation of understanding. Easy to understand drug prototype boxes are integrated throughout the book as well as integrated content summaries. It includes the popular and proven "Focus on" theme for drug use across the lifespan, cultural and gender considerations, evidence-based practice, patient teaching, herbal and alternative therapies and dosage calculation, with "Focus on Safe Medication Administration" and a "Drugs in Focus" table for each classification of drugs. Drug discussions include therapeutic actions and indications, pharmacokinetics, contraindications and cautions and adverse effects. Detailed rationales are presented throughout. Each chapter opens with Learning Objectives and a Glossary of Key Terms, and ends with NCLEX-style questions, and contains a case study-based critical thinking exercise with a discussion and case-based nursing care guide. Included in this package is Lippincott's Photo Atlas of Medication Administration (ISBN 9781451112481) which uses the nursing process format to provide step-by-step nursing skills.

Pharmacology Study Guide

Introduction to Clinical Pharmacology - E-Book

Nursing Pharmacology

Corresponding to the chapters in McCuistion's Pharmacology: A Patient-Centered Nursing Process Approach, 10th Edition, this hands-on study guide offers engaging activities to help you review and remember essential nursing pharmacology. Exercises include study questions, case studies, and NCLEX® Examination-style questions. This new edition also features alternate item format questions including multiple response, fill-in-the-blank calculations, and ordered response questions. It's an essential tool in helping you apply your knowledge of pharmacology to clinical practice, develop pharmacology-related clinical reasoning skills, and master safe drug administration. NCLEX® review questions include an alternate item format NCLEX®-style question in each chapter along with a number of application-level questions throughout the workbook. Drug calculations chapter follows the outline of the main-text chapter to help you test your knowledge and skill in drug dosage calculation. Sample drug labels have been updated to reflect the latest drug labels from the main 10th edition text. Detailed case studies enhance your understanding of nursing responsibilities in therapeutic pharmacology. Answers for all exercises are provided at the back of the book to facilitate self-study. Rationales are also included for all application-level questions and case study questions. Focus on safety includes a special icon that calls attention to questions related to safe patient care. NEW! Updated content incorporates updated drug labels, removal of discontinued drugs, updated case studies, and updated study questions to reflect all the updates that have been made to the 10th edition of the main textbook.
