By far the most influential work on the history of the body, across a wide range of academic disciplines, remains that of Thomas Laqueur. This book puts on trial the one-sex/two-sex model of Laqueur's *Making Sex: Body and Gender from the Greeks to Freud* through a detailed exploration of the ways in which two classical stories of sexual difference were told, retold and remade from the mid-sixteenth to the nineteenth century. Agnodike, the 'first midwife' who disguises herself as a man and then exposes herself to her potential patients, and Phaethousa, who grows a beard after her husband leaves her, are stories from the ancient world that resonated in the early modern period in particular. Tracing the reception of these tales shows how they provided continuity despite considerable change in medicine, being the common property of those on different sides of professional disputes about women's roles in both medicine and midwifery. The study reveals how different genres used these stories, changing their characters and plots, but always invoking the authority of the classics in discussions of sexual identity. The study raises important questions about the nature of medical knowledge, the relationship between texts and observation, and the understanding of sexual difference in the early modern world beyond the one-sex model.

‘ MEIN KAMPF ’ is the autobiography of Adolf Hitler gives detailed insight into the mission and vision of Adolf Hitler that shook the world. This book is the merger of two volumes. The first volume of MEIN KAMPF ’ was written while the author was imprisoned in a Bavarian fortress. The book deals with events which brought the author into this blight. It was the hour of Germany ’ s deepest humiliation, when Napoleon has dismembered the old German Empire and French soldiers occupied almost the whole of Germany. The book narrates how Hitler was arrested with several of his comrades and imprisoned in the fortress of Landsberg on the river Lech. During this period only the author wrote the first volume of MEIN KAMPF. The Second volume of MEIN KAMPF was written after release of Hitler from prison and it was published after the French had left the Ruhr, the tramp of the invading armies still echoed in German ears and the terrible ravages had plunged the country into a state of social and economic Chaos. The beauty of the book is, MEIN KAMPF is an historical document which bears the imprint of its own time. Moreover, Hitler has declared that his acts and ‘ public statements ’ constitute a partial revision of his book and are to be taken as such. Also, the author has translated Hitler ’ s ideal, the Volkischer Staat, as the People ’ s State. The author has tried his best making German Vocabulary easy to understand. You will never be satisfied until go through the whole book. A must read book, which is one of the most widely circulated and read books worldwide.

As a field, education has largely failed to learn from experience. Time after time, promising education reforms fall short of their goals and are abandoned as other promising ideas take their place. In *Learning to Improve*, the authors argue for a new approach. Rather than “implementing fast and learning slow,” they believe educators should adopt a more rigorous approach to improvement that allows the field to “learn fast to implement well.” Using ideas borrowed from improvement science, the authors show how a process of disciplined inquiry can be combined with the use of networks to identify, adapt, and successfully scale up promising interventions in education.

Organized around six core principles, the book shows how “networked improvement communities” can bring together researchers and practitioners to accelerate learning in key areas of education. Examples include efforts to address the high rates of failure among students in community college remedial math courses and strategies for improving feedback to novice teachers. *Learning to Improve* offers a new paradigm for research and development in education that promises to be a powerful driver of improvement for the nation’s schools and colleges.

The Rise of the West, winner of the National Book Award for history in 1964, is famous for its ambitious scope and intellectual rigor. In it, McNeill challenges the Spengler-Toynbee view that a number of separate civilizations pursued essentially independent careers, and argues instead that human cultures interacted at every stage of their history. The author suggests that from the Neolithic beginnings of grain agriculture to the present major social changes in all parts of the world were triggered by new or newly important foreign stimuli, and he presents a persuasive narrative of world history to support this claim. In a retrospective essay titled "The Rise of the West after Twenty-five Years," McNeill shows how his book was shaped by the time and place in which it was written (1954-63). He discusses how historiography

subsequently developed and suggests how his portrait of the world's past in *The Rise of the West* should be revised to reflect these changes. "This is not only the most learned and the most intelligent, it is also the most stimulating and fascinating book that has ever set out to recount and explain the whole history of mankind. . . . To read it is a great experience. It leaves echoes to reverberate, and seeds to germinate in the mind."—H. R. Trevor-Roper, *New York Times Book Review*

The authors chart a middle course in our war over religion and public education, one that builds on a developing national consensus among educational and religious leaders. While it is not proper for schools to practice religion or proselytize, neither is it permissible to make them religion-free zones. Schools do not take religion seriously, as the authors' review of textbooks and the new national content standards makes clear. In Part One, they outline the civic, constitutional, and

educational frameworks that should shape the treatment of religion in the curriculum and classroom. In Part Two, they explore major issues relating to religion in different domains of the curriculum in elementary education and in middle and high school courses in history, civics, economics, literature, and the sciences. They also discuss Bible courses and world religions courses and explore the relationship of religion to moral education and sex education.
