This book of proceedings collects the papers presented at the Workshop on Diagnostics for ITER, held at Villa Monastero, Varenna (Italy), from August 28 to September 1, 1995. The Workshop was organised by the International School of Plasma Physics "Piero Caldirola. " Established in 1971, the ISPP has organised over fifty advanced courses and workshops on topics mainly related to plasma physics. In particular, courses and workshops on plasma diagnostics (previously held in 1975, 1978, 1982, 1986, and 1991) can be considered milestones in the history of this institution. Looking back at the proceedings of the previous meetings in Varenna, one can appreciate the rapid progress in the field of plasma diagnostics over the past 20 years. The 1995 workshop was co-organised by the Istituto di Fisica del Plasma of the National Research Council (CNR). In contrast to previous Varenna meetings on diagnostics, which have covered diagnostics in present-day tokamaks and which have had a substantial tutorial component, the 1995 workshop concentrated specifically on the problems and challenges of ITER diagnostics. ITER (the International Thennonuclear Experimental Reactor, a joint venture of Europe, Japan, Russia, and the United States, presently under design) will need to measure a wide range of plasma parameters in order to reach and sustain high levels of fusion power. A list of the measurement requirements together with the parameter ranges, target measurement resolutions, and accuracies provides the starting point for selecting a list of candidate diagnostic systems.

There are over fifteen thousand homicides committed in the United States each year. Depraved madman Gerald Rucker has spent a lifetime contributing to those statistics through the murders of more than fifteen women. But the selection of his latest victim has come at a price. Her death has inspired a deep thirst for revenge in an unlikely adversary: attorney Nick Lacour. Lacour's newfound fury rivals the killer's thirst for blood now the hunter has become the hunted. Through a series of dramatic events, Rucker and Lacour enter a collision course that threatens to destroy everyone and everything in their path. This unavoidable conflict is enhanced by their shared interest in the beautiful and exotic Angela Graves. Lacour will do anything in his power to protect her; and Rucker will stop at nothing until she's dead. Linked by fate, these three completely different people meet in one final, cataclysmic confrontation that will leave you breathless and emotionally ravaged. The suspense in "Jagged Fate" is so intense, that I jumped a foot every time I heard a noise in the house. If a man in uniform had rung the doorbell, I would have never opened the door. Beth Bruno, editor and author of Wild Tulips Debut novelist Santel delves deep into Gerald's psyche, rendering a vivid and disturbing psychopath. -Kirkus Discoveries"

Lethal Deception and Lethal Obsession

Ants are probably the most dominant insect group on Earth, representing ten to fifteen percent of animal biomass in terrestrial ecosystems. Flowering plants, meanwhile, owe their evolutionary success to an array of interspecific interactions—such as pollination, seed dispersal, and herbivory—that have helped to shape their great diversity. The Ecology and Evolution of Ant-Plant Interactions brings together findings

from the scientific literature on the coevolution of ants and plants to provide a better understanding of the unparalleled success of these two remarkable groups, of interspecific interactions in general, and ultimately of terrestrial biological communities. The Ecology and Evolution of Ant-Plant Interactions synthesizes the dynamics of ant-plant interactions, including the sources of variation in their outcomes.

Victor Rico-Gray and Paulo S. Oliveira capture both the emerging appreciation of the importance of these interactions within ecosystems and the developing approaches that place studies of these interactions into a broader ecological and evolutionary context. The collaboration of two internationally renowned scientists, The Ecology and Evolution of Ant-Plant Interactions will become a standard reference for

understanding the complex interactions between these two taxa.

Electronics Engineer's Reference Book, Sixth Edition is a five-part book that begins with a synopsis of mathematical and electrical techniques used in the analysis of electronic systems. Part II covers physical phenomena, such as electricity, light, and radiation, often met with in electronic systems. Part III contains chapters on basic electronic components and materials, the building blocks of any electronic design. Part IV highlights electronic circuit design and instrumentation. The last part shows the application areas of electronics such as radar and computers.

A rollicking ride through the true crime history of the American Southwest from the USA Today-bestselling author of The Darkest Night. The line between history and mythology is razor thin—and the American Southwest often erases the line altogether. We might never disentangle crime-fact from fiction, but this book will transport you to Billy the Kid's real-life stomping grounds, legendary Tombstone, the childhood home of one of the worst al Qaeda terrorists, and the scenes of dozens of crimes throughout Arizona and New Mexico's history. Dozens of fascinating stories in Outlaw Southwest are told in the same fast-paced, enthralling voice that's made Ron Franscell one of America's most beloved crime writers...and the Crime Buff's Guides a three-time winner of the TrueCrimeZine.com Book of the Year! Includes GPS COORDINATES, PHOTOS AND MORE! "Well researched ... Armchair detectives will enjoy the tales, but the book's purpose is to take the reader to the scene of the crime."—Albuquerque Journal "The ultimate guilty pleasure book."—San Antonio (TX)Express-News "Perfect for summer vacations because you can put it down and pick it up without losing your place (but you won't want to put it down).

For those of who week true-crime stories, it's a fascinating look at the dark side."—Tucson (AZ) Sentinel

Hello Girls & Boys!

Rose DeAngelo knows that insuring high-level shipments is a risky business, but when hijackers start lifting loads and injuring drivers and the string of thefts seems squarely targeted at her clients, she starts to feel the heat. Especially when all the signs point to her as the primary suspect. To investigator Mike Ramsey, it looks like a clear-cut case of an inside job. Working undercover and posing as a trucker with valuable cargo, he sets himself up as the hijacking ring's next target, hoping to catch the thieves—and Rose—in the act. As the two are thrown together to find out who's behind the dangerous crimes, each harboring doubts about the other, their suspicions mount even as an undeniable passion grows between them. But what neither of them realizes is that the hijackers are closing in, and Rose and Ramsey will be forced to trust each other and join forces or risk losing everything, including each other. Lethal Deception was originally published under the title Honeyauckle Rose.

For the first time ever, Comet Press brings you their infamous THINGS anthologies in one terrifying trio, featuring authors such as Ramsey Campbell, Graham Masterton, Tim Curran, John Shirley, Simon Wood, Fred Venturini and many more. Three anthologies in one, with 700 pages and 42 stories, including the newest book in the series, STIFF THINGS! VILE THINGS! EXTREME DEVIATIONS OF HORROR -- the ultimate collection of extreme horror from award-winning masters and up-and-coming authors of macabre fiction. SICK THINGS: EXTREME CREATURE HORROR -- a disturbing collection of extreme creature horror with 17 deviant and gore-soaked stories featuring demons, cannibals, mutants, golems, werewolves, and many more vile creatures, monsters, and beasts. STIFF THINGS: THE SPLATTERPORN ANTHOLOGY-- ratchets up the eroticism and visceral intensity with twisted hardcore stories that penetrate new depths of psychosexual horror. Not for the squeamish or prudish. Don't get any on you. EDITORIAL REVIEWS "This book is a definite for any extreme horror fan. Full of terror, sex, and gore, I don't recommend this for the faint of heart or for a light read at a beauty salon." --FANGORIA (on Vile Things) "But dismembered members aside, there are no cheap gross-outs here; even though the focus is clearly on the vile and unpalatable these don't feel like stories that were written with the sole purpose of being labeled 'extreme horror' or to merely revel in their graphic, gory descriptions. Simply put, VILE THINGS is every deviant horror fan's wet dream." --RUE MORGUE "VILE THINGS is one of the stronger horror anthologies I have come across in some time, its theme literally appears to be centered around creatures, topics, or situations that are so vile it would send a shiver down your spine. It includes stories from both established and newer horror authors, and some of the stories are more extreme than the usual fare."--MONSTER LIBRARIAN "Cover every orifice. Comet Press' new collection is making a beeline for the soft contents of your body--and it doesn't care one bit where it makes its grand entrance, orbital sockets or otherwise. Rest assured this violation will be painful, given the tight confinements of our fallible frames of flesh—but anything less than a full-on ass-rape would probably seem insufficient in the eyes of editrix Cheryl Mullenax.Mullenax has assembled a rogue's gallery of intelligent grotesqueries that will temper one's appetite hours after closing the book..." --FANGORIA (on Sick Things) "I thoroughly enjoyed reading this Anthology. Like I said in the beginning, no story fell short for me. Everyone brought an erotic taste that stimulated every sense of my being. I highly recommend this book who love some deranged erotic horror." -- SPLATTER CAPE (on Stiff Things)

Two strong heroines, two unlikely romances, and nonstop suspense make for two great novels! In Lethal Deception, Rose DeAngelo knows that insuring high-level shipments is a risky business, but when hijackers start lifting loads and injuring drivers and the string of thefts seems squarely targeted at her clients, she starts to feel the heat. Especially when all the signs point to her as the primary suspect. To investigator Mike Ramsey, it looks like a clear-cut case of an inside job. But what neither of them realizes is that the hijackers are closing in, and Rose and Ramsey will be forced to trust each other and join forces or risk losing everything, including each other. In Lethal Obsession, Kat Malone has always been a tough and focused undercover agent, and over the years she's made a lot of enemies. Now one of them is back and stalking her viciously, bent on revenge. Proper and prudish Seamus O'Rourke has spent his life cleaning up the messes of his twin brother, Riley, and it turns out one of those messes is Kat Malone. Reluctant to help her but shocked by the depravity of her sadistic stalker, Seamus takes on the role of Kat's protector. Forced into hiding following a deadly attack, tensions mount and passions flare as Kat is faced with the stunning depth of her stalker's madness and Seamus must find the strength and determination to protect the woman he's grown to love. "Lethal Obsession. . . had me on the edge of my seat."—Lori F.

Toys are fun—but they are also serious business, as David Veart makes clear in this remarkable story of New Zealanders and their toys from Maori voyagers to 21st-century gamers. Deploying the tools of archaeology and oral history, Veart digs through a few centuries of pocket knives and plasticine to take us deep into the childhoods of Aotearoa. His story explores how people made their fun on the far side of the ocean—the Maori and Pakeha learned knucklebones from each other; young Aucklanders established the largest Meccano club in the world; and Fun Ho!, Torro, Lincoln International, and Luvmie helped to build a successful local toy industry under the shade of import protection. Hello Girls & Boys! covers the crazes and collecting, playtimes and preoccupations of big and little New Zealand kids for generations. With its memories of knucklebones and double happys, golliwogs and tin canoes, marbles and Meccano, Tonka trucks and Buzzy Bees, this is a seriously fun New Zealand toy story.
