

Reti Domestiche Terza Edizione Pocket

Presents evidence to support the author's woman-centered interpretation of prehistoric civilizations, considering the prehistoric goddesses, gods and religion, and discussing the living goddesses--deities which have continued to be venerated through the modern era.

A total institution is defined by Goffman as a place of residence and work where a large number of like-situated, individuals, cut off from the wider society for an appreciable period of time, together lead an enclosed, formally administered round of life. Prisons serve as a clear example, providing we appreciate that what is prison-like about prisons is found in institutions whose members have broken no laws. This volume deals with total institutions in general and, mental hospitals, in particular. The main focus is, on the world of the inmate, not the world of the staff. A chief concern is to develop a sociological version of the structure of the self. Each of the essays in this book were intended to focus on the same issue--the inmate's situation in an institutional context. Each chapter approaches the central issue from a different vantage point, each introduction drawing upon a different source in sociology and having little direct relation to the other chapters. This method of presenting material may be irksome, but it allows the reader to pursue the main theme of each paper analytically and comparatively past the point that would be allowable in chapters of an integrated book. If sociological concepts are to be treated with affection, each must be traced back to where it best applies, followed from there wherever it seems to lead, and pressed to disclose the rest of its family.

A “gripping, sensitive” biography of the trailblazing singer who carved a path for African American artists including Marian Anderson and Paul Robeson (The Atlanta Voice). Performing in a country rife with racism and segregation, the tenor Roland Hayes was the first African American man to reach international fame as a concert performer. He became one of the few artists in the world who could sell out Town Hall, Carnegie Hall, Symphony Hall, and Covent Garden. Performing the African American spirituals he was raised on, his voice was marked with a unique sonority which easily navigated French, German, and Italian art songs. A multiculturalist both on and off the stage, he counted among his friends George Washington Carver, Eleanor Roosevelt, Ezra Pound, Pearl Buck, Dwight Eisenhower, and Langston Hughes. This “substantial and well-documented” biography spans the history of Hayes’s life and career and the legacy he left behind as a musician and a champion of African American rights (BBC Music Magazine). It is an authentic, panoramic portrait of a man who was as complex as the music he performed. “Like many generations of celebrated African American concert artists, I am an inheritor of the legacy left by the great Roland Hayes. Yet, we hardly know his name today. With this long overdue book, the oversight is now remedied.” —Lawrence Brownlee, Metropolitan Opera “A wonderful journey through Hayes’ performances, racial plight and acceptance.” —Examiner.com

Everything you need to know about IV drugs... all in your pocket. This handy, spiral-bound guide features monographs for all of the most common IV drugs in an easy-to-use format that’s organized alphabetically by generic drug name. You’ll also have valuable information on drug calculations, safe administration techniques, and compatibilities at your fingertips.

The Script of Humanism

This book explores the bioclimatic approach to building design. Constant innovations in the field are evident, including the need to face climate changes and increase the local resilience at different scales (regional, urban, architectural). Differently from other contributions, this book provides a definition of the bioclimatic design approach following a technological and performance-driven vision. It includes one of the largest collection of research voices on the topic, becoming also a critical reference work for bioclimatic theory. It is intended for architects, engineers, researchers, and technicians who have professional and research interests in bioclimatic and in sustainable and technological design issues.

Details descriptions of the principles associated with each layer and presents many examples drawn the Internet and wireless networks.

Shell Scripting Made Easy If you want to learn how to write shell scripts like a pro, solve real-world problems, or automate repetitive and complex tasks, read on. Hello. My name is Jason Cannon and I'm the author of Linux for Beginners, Python Programming for Beginners, and an instructor to thousands of satisfied students. I started my IT career in the late 1990's as a Unix and Linux System Engineer and I'll be sharing my real-world shell scripting and bash programming experience with you throughout this book. By the end of this book you will be able to create shell scripts with ease. You'll learn how to take tedious and repetitive tasks and turn them into programs that will save you time and simplify your life on Linux, Unix, or MAC systems. Here is what you will get and learn by reading this Shell Scripting book: A step-by-step process of writing shell scripts that solve real-world problems. The #1 thing you must do every time you create a shell script. How to quickly find and fix the most shell scripting errors. How to accept input from a user and then make decisions on that input. How to accept and process command line arguments. What special variables are available, how to use them in your shell scripts, and when to do so. A shell script creation check list -- You'll never have to guess what to include in each of your shell scripts again. Just use this simple check list. A shell script template (boilerplate). Use this format for each of your shell scripts. It shows exactly what to include and where everything goes. Eliminate guesswork! Practice exercises with solutions so you can start using what you learn right away. Real-world examples of shell scripts from my personal collection. A download that contains the scripts used in the book and lessons. You'll be able to look at and experiment with everything you're learning. Learn to Program Using Any Shell Scripting Language What you learn in this book can be applied to any shell, however the focus is on the bash shell and you'll learn some really advanced bash features. Again, whether you're using bash, bourne (sh), KornShell (ksh), C shell (csh), Z shell (zsh), or even the tcsh shell, you'll be able to put what you learn in this book to good use. Perfect for Linux, Unix, Mac and More! Also, you'll be able to use these scripts on any Linux environment including Ubuntu, Debian, Linux Mint, RedHat, Fedora, OpenSUSE, Slackware, Kali Linux and more. You're scripts will even run on other operating systems such as Apple's Mac OS X, Oracle's Solaris, IBM's AIX, HP's HP-UX, FreeBSD, NetBSD, and OpenBSD. Scroll up, click the Buy Now With I Click button and get started learning Linux today!

Processes of multi-scalar regional urbanization are occurring worldwide. Such processes are clearly distinguishable from those of the nineteenth and twentieth centuries due to the shifting concepts of both the city and the metropolis. International literature highlights how what we have historically associated with the idea of cities has long been subjected to consistent reconfiguration, which involves stressing some of the typical features of the idea of “cityness”. Post-Metropolitan Territories: Looking for a New Urbanity is the product of a research project funded by the Italian Ministry for Education, Universities and Research (MIUR). It constitutes a thorough overview of a country that is one of Europe's most diverse in terms of regional development and performance: Italy. This book brings together case studies of a number of Italian cities and their hinterlands and looks at new forms of urbanization, exploring themes of sustainability, industrialization, de-industrialization, governance, city planning and quality of life. This volume will be of great interest to academics and students who study regional development, economic geography and urban studies, as well as civil servants and policymakers in the field of spatial planning, urban policy, territorial policies and governance.

Bioclimatic Approaches in Urban and Building Design

Stories

The Natural History of Barbados

An Illustrated Essay

Temples are the most prestigious buildings in the urban landscape of ancient Italy, emerging within a network of centres of the then-known Mediterranean world. Notwithstanding the fragmentary condition of the buildings remains, these monuments and especially their richly decorated roofs are crucial sources of information on the constitution of political, social and craft identities, acting as agents in displaying the meaning of images. The subject of this volume is thematic and includes material from the Eastern Mediterranean (including Greece and Turkey). Contributors discuss the network between patron elites and specialized craft communities that were responsible for the sophisticated terracotta decoration of temples in Italy between 600 and 100 BC, focusing on the mobility of craft people and craft traditions and techniques, asking how images, iconographies, practices and materials can be used to explain the organization of ancient production, distribution and consumption. Special attention has been given to relations with the Eastern Mediterranean (Greece and Anatolia). Investigating craft communities, workshop organizations and networks has never been thoroughly undertaken for this period and region, nor for this exceptionally rich category of materials, or for the craftspeople producing the architectural terracottas. Papers in this volume aim to improve our understanding of roof production and construction in this period, to reveal relationships between main production centres, and to study the possible influences of immigrant craftspeople.

Francesco Koslovic--even his name straddles two cultures. And during the spring of 1955, in the village of Materada on the Istrian Peninsula, his two worlds are coming apart. Materada, the first volume of Fulvio Tomizza's celebrated Istrian Trilogy, depicts the Istrian exodus of the hundreds of thousands who had once thrived in a rich ethnic mixture of Italians and Slavs. Complicating Koslovic's own departure is his attempt to keep the land that he and his brother have worked all their lives. A picture of a disappearing way of life, a tale of feud and displacement, and imbued with the tastes, tales, and songs of his native Istria, Koslovic's story is a testament to the intertwined ethnic roots of Balkan history.

This book has the potential to save your life. Magnesium has been used around the world to bring people back from the brink of death and Dr Mark Sircus examines how this amazing mineral that is so overlooked by the majority affects so many aspects of our health including cancer, heart disease, diabetes, depression, asthma, inflammation, arthritis and autism.

This book explores intersectional constructions of race and whiteness in modern and contemporary Italy. It contributes to transnational and interdisciplinary reflections on these issues through an analysis of political debates and social practices, focusing in particular on visual materials from the unification of Italy (1861) to the present day. Giuliani draws attention to rearticulations of the transnationally constructed Italian ‘colonial archive’ in Italian racialised identity-politics and cultural racisms across processes of nation building, emigration, colonial expansion, and the construction of the first post-fascist Italian society. The author considers the ‘figures of race’ peopling the Italian colonial archive as composing past and present ideas and representations of (white) Italianness and racialised/gendered Otherness. Students and scholars across a range of disciplines, including Italian studies, political philosophy, sociology, history, visual and cultural studies, race and whiteness studies and gender studies, will find this book of interest.

A Trilingual Anthology of Neapolitan Poetry from the 16th Century to the Present

The Water Supply System of Siena, Italy

Australian adaptation of a book first published in the US in 1999. This volume in the For Dummies series is a guide to using the Internet. Explains choosing an Internet sever and getting connected, children and the Internet, finding what you're after online, online shopping, creating a homepage, using email, chat rooms, and swiping files. Includes CD-ROM, diagrams throughout, appendix, glossary and index. Authors are Internet experts and published writers on the topic. Australian co-author, Ebbs, has also written 'The Australian Internet Book' and edited the Australian edition of the 'Whole Internet Guide'.

New Testament Manuscripts Their Texts and Their World comprises twelve essays dealing with manuscripts of the New Testament and/or what we can learn from them today. Starting from different angles the contributors distinguished scholars of international reputation focus on the fascinating and thrilling stories manuscripts tell, for instance about the times they were produced in or the people who handled them.The multitude of manuscripts used for establishing the critical text of the New Testament is often only perceived as abbreviations in form of single letters or numerals, and today s biblical scholars may hardly ever take notice of the specific features of an original manuscript, above all those not mentioned in a critical edition. Therefore, three sets of contributions deals with the conditions under which manuscripts from the early days of Christianity were produced and transmitted, specific individual manuscripts, and then special features observed in and with the help of various manuscripts. In a final essay the usual method of how to organize and categorize New Testament manuscripts is challenged and an alternative method proposed.The essays are linked with each other so that readers may get a feeling of how astounding an occupation with the original manuscripts of the New Testament and the days of the early Christians can be.

Prison Time, the sequel to Hard Time, is the story of Shaun Attwood's journey through the Arizona Department of Corrections and his deportation to England. Sentenced to nine years in Arizona’s state prison for distributing Ecstasy, 'English Shaun' Attwood finds himself living among gang members, sexual predators and drug-crazed psychopaths. After being attacked by a 20-stone California biker in for stabbing a girlfriend, Shaun writes about the prisoners who befriend, protect and inspire him. They include T-Bone, a massive African American ex-Marine who risks his life saving vulnerable inmates from rape, and Two Tonys, an old-school Mafia murderer who left the corpses of his rivals from Tucson to Alaska. They teach Shaun how to turn incarceration to his advantage, and to learn from his mistakes. Resigned to living alongside violent, mentally-ill, and drug-addicted inmates, Shaun immerses himself in psychology and philosophy to try to make sense of his past behaviour, and begins applying what he learns as he adapts to prison life. Encouraged by Two Tonys to explore fiction as well, Shaun reads over a thousand books which, with support from brilliant psychotherapist Dr. O, speed along his personal development. As his ability to deflect daily threats improves, Shaun begins to look forward to his release with optimism and a new love waiting for him. Yet the words of Aristotle from one of Shaun’s books will prove prophetic: 'We cannot learn without pain'.

Today's market for mobile apps goes beyond the iPhone to include BlackBerry, Nokia, Windows Phone, and smartphones powered by Android, webOS, and other platforms. If you're an experienced web developer, this book shows you how to build a standard app core that you can extend to work with specific devices. You'll learn the particulars and pitfalls of building mobile apps with HTML, CSS, and other standard web tools. You'll also explore platform variations, finicky mobile browsers, Ajax design patterns for mobile, and much more. Before you know it, you'll be able to create mashups using Web 2.0 APIs in apps for the App Store, App World, OVI Store, Android Market, and other online retailers. Learn how to use your existing web skills to move into mobile development Discover key differences in mobile app design and navigation, including touch devices Use HTML, CSS, JavaScript, and Ajax to create effective user interfaces in the mobile environment Learn about technologies such as HTML5, XHTML MP, and WebKit extensions Understand variations of platforms such as Symbian, BlackBerry, webOS, Bada, Android, and iOS for iPhone and iPad Bypass the browser to create offline apps and widgets using web technologies

"In this marvelous, learned, and friendly volume, Helen Barolini traces the contours of his career and reveals Aldus and the Aldine press in historical and cultural context; she admirably conveys the magic of an age in which the book as we know it was invented.

Historians have conventionally viewed intellectual and artistic achievement as a seamless progression in a single direction, with the Renaissance, as identified by Jacob Burckhardt, as the root and foundation of modern culture. But in this brilliant new analysis William Bouwsma rethinks the accepted view, arguing that while the Renaissance had a beginning and, unquestionably, a climax, it also had an ending. Examining the careers of some of the greatest figures of the age--Montaigne, Galileo, Jonson, Descartes, Hooker, Shakespeare, and Cervantes among many others--Bouwsma perceives in their work a growing sense of doubt and anxiety about the modern world. He considers first those features of modern European culture generally associated with the traditional Renaissance, features which reached their climax in the late sixteenth and early seventeenth centuries. But even as the movements of the Renaissance gathered strength, simultaneous impulses operated in a contrary direction. Bouwsma identifies a growing concern with personal identity, shifts in the interests of major thinkers, a decline in confidence about the future, and a heightening of anxiety. Exploring the fluctuating and sometimes contradictory atmosphere in which Renaissance artists and thinkers operated, Bouwsma shows how the very liberation from old boundaries and modes of expression that characterized the Renaissance became itself increasingly stifling and destructive. By drawing attention to the waning of the Renaissance culture of freedom and creativity, Bouwsma offers a wholly new and intriguing interpretation of the place of the European Renaissance in modern culture.

Pocket-sized laminated card offers quick access to electrocardiogram (ECG) data. Addresses the varying degrees of arterioventricular blockages, bundle branch blocks, hypertrophy, electrolyte disturbance drugs, tachyarrhythmias, myocardial ischemia, and myocardial infarction stages. ECG tracings accompany the data. Hole-punched on the top left corner.

World War II stories on Italian women in the Resistance as heroines and traitors, and the way they exploited their femininity. In Red Flag, a woman hides guns by covering them with a soiled sanitary napkin.

The fast and easy way to get up and running with Windows 10 Windows 10 For Dummies covers the latest version of Windows and gets you up and running with the changes and new features you'll find in this updated operating system. Packed with time-saving tips to help you get the most out of the software, this helpful Windows 10 guide shows you how to n touchscreen, connecting to the web, and troubleshooting problems and making quick fixes. Assuming no prior knowledge of the software, Windows 10 For Dummies addresses the updates to Windows and shows you how to get things accomplished. Focusing on the features you'll go to again and again, this new edition of this bestselling tech book will have you qu accounts in one spot, managing apps, creating and managing accounts, using online tools, customizing your settings, and so much more—making you a Windows whiz in no time. Helps you navigate the twists and turns of the updated Windows interface Provides easy-to-follow answers to all of your Windows questions Illustrates the new features of Windows 10 C of Windows Whether you're new to Windows or just looking to get up to speed on what's changed in its latest release, this is the only resource you'll need.

This is a revised version of this volume. Changes in this edition include: Code has been updated to use ANSI C and the UNIX operating systems (POSIX). Covers SLIP connections (a popular program that allows TCP/IP access to the Internet over dial-up phone systems. Latest changes in Network File System protocol (NFS3). This edition focuses on the BSD version of

TCP/IP? — focusing on the client-server paradigm, and examining algorithms for both the client and server components of a distributed program. Describes the AT&T TLI interface and uses it in all examples. The principles underlying distributed programs and all server designs are emphasized. Thoroughly covers the many ways to design interactive and concurrent client-server programs. Concepts apply to Client-Server programs in general; not just TCP/IP. Any communications professional who wants to put TCP/IP to use. This is everyone working on Internet communications.

This best-selling resource provides a general overview and basic information for all adult intensive care units. The material is presented in a brief and quick-access format which allows for topic and exam review. It provides enough detailed and specific information to address most all questions and problems that arise in the ICU. Emphasis on fundamental principles is maintained. New chapters in this edition include hyperthermia and hypothermia syndromes; infection control in the ICU; and severe airflow obstruction. Sections have been reorganized and consolidated when appropriate to reinforce concepts.

Their Texts and Their World

For the technological progress in communication technology it is necessary that the advanced studies in circuit and software design are accompanied with recent results of the technological research and physics in order to exceed its limitations. This book is a guide which treats many components used in mobile communications, and in particular focuses on non-volatile memories. It emerges following the conducting line of the non-volatile memory in the wireless system: On the one hand it develops the foundations of the interdisciplinary issues needed for design analysis and testing of the system. On the other hand it deals with many of the problems appearing when the systems are realized in industrial production. These cover the difficulties from the mobile system to the different types of non-volatile memories. The book explores memory cards, multichip technologies, and algorithms of the software management as well as error handling. It also presents techniques of assurance for the single components and a guide through the Datasheet lectures.

1914. Thomas Maggs is thirteen and lives with his parents and sister at the Blue Anchor pub, in the village of Dunwich on the Suffolk coast. Born in winter while the sea stormed, Thomas is the youngest child, and the only son surviving. In Dunwich, life is quiet and shaped by the seasons: fishing and farming, the summer visitors, and the girls who come down from the Highlands to gut and pack the herring. Thomas visits his brothers' grave in the churchyard, sketches the boats from the harbor, and longs for adventure -- a chance to go to sea. Then one day a mysterious Scotsman and his red-haired wife arrive in the village. The man's name is Charles Rennie Mackintosh, but the locals are soon calling him Mac. Mac and his wife are both artists, regarded as eccentrics in town, but a source of wonder and fascination for Thomas. Yet just as Thomas and Mac's friendship begins to bloom, war with Germany is declared. The summer guests flee, replaced by regiments of soldiers on their way to Belgium. And as the war weighs increasingly heavily on the community, the villagers on the home front become increasingly suspicious of Mac and his curious behavior. Mr. Mac and Me is the story of an unlikely friendship, and a vivid portrait of one of the most brilliant and misunderstood artists of his generation.

The book reviews scholarly literature and archival sources including maps and diagrams, to better situate Siena's achievement in urban history and broadens our understanding of medieval technology and urban life.

The Internet is an active medium. You can't just sit and watch it like television; you have to try things, poke around, and find the sites, information, and people that you need and enjoy. Language standardization is the process by which conventional forms of a language are established and maintained. Bringing together internationally renowned experts, this Handbook provides a comprehensive overview of standardization, norms and standard languages. Chapters are grouped into five thematic areas: models and theories of standardization; language education, borders and boundaries, and standardization in Late Modernity. Each chapter addresses a specific issue in detail, illustrating it with linguistic case studies and taking into account the particular political, social and cultural context. Showcasing cutting-edge research, it offers fresh perspectives that go beyond traditional accounts of the standardization process and provides new insights into minoritized, indigenous and stateless languages. Surveying a wide range of languages and approaches, this Handbook is an essential resource for all those interested in language standards and standard languages.

The Second Edition of Parliamo italiano! instills five core language skills by pairing cultural themes with essential grammar points. Students use culture—the geography, traditions, and history of Italy—to understand and master the language. The 60-minute Parliamo italiano! video features stunning, on-location footage of various cities and regions throughout Italy, and each unit's theme and geographic focus.

Ants are probably the most dominant insect group on Earth, representing ten to fifteen percent of animal biomass in terrestrial ecosystems. Flowering plants, meanwhile, owe their evolutionary success to an array of interspecific interactions—such as pollination, seed dispersal, and herbivory—that have helped to shape their great diversity. The Ecology and Evolution of Ant-Plant Interactions synthesizes findings from the scientific literature on the coevolution of ants and plants to provide a better understanding of the unparalleled success of these two remarkable groups, of interspecific interactions in general, and ultimately of terrestrial biological communities. The Ecology and Evolution of Ant-Plant Interactions synthesizes the dynamics of ant-plant interactions and the resulting ecological and evolutionary outcomes. Victor Rico-Gray and Paulo S. Oliveira capture both the emerging appreciation of the importance of these interactions within ecosystems and the developing approaches that place studies of these interactions into a broader ecological and evolutionary context. The collaboration of two internationally renowned scientists, The Ecology and Evolution of Ant-Plant Interactions is a reference for understanding the complex interactions between these two taxa.

An eye for an eye. It's very simple. You choose your homeland like a hyena picking and choosing where he steals his next meal from. Scavenger. Yes you grovel to the feet of Mengistu and when his people spit at you and kick you from the bowl you scuttle across the border. Scavenger. As a violent civil war rages back home in Ethiopia, teenager Alem finds the best holiday ever. The next morning his father is gone and has left a note explaining that he and his mother want to protect Alem from the war. This strange grey country of England is now his home. On his own, and in the hands of the social services and the Refugee Council, Alem lives from letter to letter, waiting to hear something from his father. The Refugee League' Ruth and dangerous Sweeney – three unexpected allies who spur him on in his fight to be seen as more than just the Refugee Boy. Lemn Sissay's remarkable stage adaptation of Benjamin Zephaniah's bestselling novel is published here in the Methuen Drama Student Edition series, featuring commentary & notes by Professor Lynette Goddard (University of York).
