A collection of 100 postcards, each featuring a different and iconic Penguin book jacket. From classics to crime, here are over seventy years of quintessentially British design in one box. In 1935 Allen Lane stood on a platform at Exeter railway station, looking for a good book for the journey to London. His disappointment at the poor range of paperbacks on offer led him to found Penguin Books. The quality paperback had arrived. Declaring that 'good design is no more expensive than bad', Lane was adamant that his Penguin paperbacks should cost no more than a packet of cigarettes, but that they should always look distinctive. Ever since then, from their original - now world-famous - look featuring three bold horizontal stripes, through many different stylish, inventive and iconic cover designs, Penguin's paperback jackets have been a constantly evolving part of Britain's culture. And whether they're for classics, crime, reference or prize-winning novels, they still follow Allen Lane's original design mantra. Sometimes, you definitely should judge a book by its cover.

A dazzling and darkly comic memoir about coming of age in a black funeral home in Baltimore

Sheri Booker was only fifteen when she started working at Wylie Funeral Home in West Baltimore.

She had no idea her summer job would become nine years of immersion into a hidden world. Reeling

from the death of her beloved great aunt, Sheri found comfort in the funeral home and soon had the run of the place. With AIDS and gang violence threatening to wipe out a generation of black men, Wylie was never short on business. As families came together to bury one of their own, Booker was privy to their most intimate moments of grief and despair. But along with the sadness, Booker encountered moments of dark humor: brawls between mistresses and widows, and car crashes at McDonald's with dead bodies in tow. While she never got over her terror of the embalming room, Booker learned to expect the unexpected and to never, ever cry. *Nine Years Under* offers readers an unbelievable glimpse into an industry in the backdrop of all our lives.

Today, the moving image is ubiquitous in global contemporary art. The first book to tell the story of the postwar expanded cinema that inspired this omnipresence, *Between the Black Box and the White Cube* travels back to the 1950s and 1960s, when the rise of television caused movie theaters to lose their monopoly over the moving image, leading cinema to be installed directly alongside other forms of modern art. Explaining that the postwar expanded cinema was a response to both developments, Andrew V. Uroskie argues that, rather than a formal or technological innovation, the key change for artists involved a displacement of the moving image from the familiarity of the cinematic theater to original spaces and contexts. He shows how newly available, inexpensive film and video technology enabled artists such as Nam June Paik, Robert Whitman, Stan VanDerBeek, Robert Breer, and especially Andy Warhol to become filmmakers. Through their efforts to explore a fresh way of experiencing the moving image, these artists sought to reimagine the nature and possibilities of art in a post-cinematic age and helped to develop a novel space between the "black box" of the movie theater and the "white cube" of the art gallery. Packed with over one hundred illustrations, *Between the Black Box and the White Cube* is a compelling look at a seminal moment in the cultural life of the moving image and its emergence in contemporary art.
