TESOL International Association has defined a core set of principles for the exemplary teaching and learning of English as a new language. This book shows educators how to apply these principles to teaching young English learners (2- to 12-year-olds) in a foreign language (EFL) setting. The 6 Principles(R) and their recommended practices are targets of teaching excellence that provide teachers with the knowledge to improve instruction and assessment. Instructional techniques are illustrated with a multitude of classroom examples, case studies, checklists, and vignettes. This volume documents international, national, and small-scale testing and assessment projects of English language education for young learners, across a range of educational contexts. It covers three main areas: age-appropriate 'can do statements' and task types for teaching and testing learners between the ages of 6 to 13; innovative approaches to self-assessment, diagnostic testing, self-perception, and computer-based testing; and findings on how young learners perform on vocabulary, listening, speaking, pronunciation, and reading comprehension tests in European and Asian contexts. Early language learning has become a major trend in English language education around the globe. As a result of the spread of teaching English to a growing number of young children, assessment of and for learning have emerged as key issues. In line with this development, there is a clear and emerging need to make early language programs accountable and to assess both the progress children make over time and to quantify their achievement at various stages of development. This volume informs stakeholders about the realistic goals of early language learning, their efficiency, and how much progress children make over time.

TEACHING ENGLISH TO YOUNG LEARNERS

This collection of essays examines English language learning in formal education contexts from pre-school to lower secondary level. Focused on an in-service teacher education project that aimed to enhance the teaching of English in a group of schools, it takes into account the perspectives of multiple stakeholders – heads of school, teachers, parents and children. Its novelty lies in the variety of themes it covers, such as the account of a vertical implementation of a Content and Language Integrated

Learning (CLIL) project at three school levels, teachers' attitudes to using picturebooks in L2 settings, cultural differences in the presentation of content in textbooks, and the role of the native language assistant. "English for Young Learners" makes a valid contribution to research on a matter of crucial importance in Italian education in the 21st century, the improvement of the teaching and learning of English. It will be of interest to student teachers, educators, practitioners and researchers.

An overview of the issues surrounding the teaching of young learners combines up-to-date research with principles of classroom practice to discuss skills, vocabulary, grammar, adapting and designing materials, planning and assessment, and policy decisions.

Storybridge to Second Language Literacy makes a case for using authentic children's literature—alternately also referred to as 'stories' or 'real books'—as the medium of instruction in teaching English to young learners, particularly in contexts where children must access general curriculum subjects in English. The author first proposes theoretical foundations for the argument that illustrated children's books are superior to traditional language teaching courses in the primary school. She builds the case around the motivational power of stories, the language and content of quality children's literature, and the potential of literature to contribute to development of second language academic literacy. She then reviews research of the past thirty years that clearly supports her claim. Finally, she uses transcripts from real classrooms to illustrate how teachers in diverse contexts make use of stories. Through the classroom vignettes, a practical model of literature-based instruction emerges that is adaptable to a wide range of primary school teaching contexts, including English as a second language contexts in core-English countries. Storybridge to Second Language Literacy compiles in one volume solid theoretical foundations for story-based instruction, research evidence of the past thirty years supporting the approach (not currently available in a single source), and extensive classroom vignettes illustrating diverse practical applications (not lesson plans). This makes the book valuable for anyone in the field of young learner ELT. MA students in TESOL will find the book useful and will develop an understanding of why and how literature-based instruction works and develop insight to guide their practice. Members of TESOL Elementary Education, EFL, and Bilingual Education SIGs, and IATEFL Young Learner SIG will be interested in the volume. Instructors of teacher development courses should also find the proposed volume a valuable addition

to assigned readings. Each chapter is followed by 'Think about it' questions and 'Try it out' suggestions.
