*Excerpt from The Government of the People of the State of Tennessee IT was once thought that government first arose from a specific agreement among men, but this theory has given place to the more reasonable hypothesis that it originated in the family and has been developed and changed by the conditions, circumstances, and necessities of humanity. The father of a family was its natural ruler. If he had a strong personality, or in some way became separated from his kinsmen, as was the case with Abraham, his descendants, in time, grew to be a distinct nation with their own language, laws, religion, and traditions. After the founder of the tribe passed away, the ruler chosen was generally the most noted warrior, or a man who possessed some marked powers of leadership. *In 1956, one year before federal troops escorted the Little Rock 9 into Central High School, fourteen year old Jo Ann Allen was one of twelve African-American students who broke the color barrier and integrated Clinton High School in Tennessee. At first things went smoothly for the Clinton 12, but then outside agitators interfered, pitting the townspeople against one another. Uneasiness turned into anger, and even the Clinton Twelve themselves wondered if the easier thing to do would be to go back to their old school. Jo Ann--clear-eyed, practical, tolerant, and popular among both black and white students---found herself called on as the spokesperson of the group. But what about just being a regular teen? This is the heartbreaking and relatable story of her four months thrust into the national spotlight and as a trailblazer in history. In August of 1920, women's suffrage in America came down to the vote in Tennessee. If the Tennessee legislature approved the 19th amendment it would be ratified, giving all American

women the right to vote. The historic moment came down to a single vote and the voter who tipped the scale toward equality did so because of a powerful letter his mother, Febb Burn, had written him urging him to "Vote for suffrage and don't forget to be a good boy." The Voice That Won the Vote is the story of Febb, her son Harry, and the letter than gave all American women a voice.

Well after slavery was abolished, its legacy of violence left deep wounds on African Americans' bodies, minds, and lives. For many victims and witnesses of the assaults, rapes, murders, nightrides, lynchings, and other bloody acts that followed, the suffering this violence engendered was at once too painful to put into words yet too horrible to suppress. In this evocative and deeply moving history Kidada Williams examines African Americans' testimonies about racial violence. By using both oral and print culture to testify about violence, victims and witnesses hoped they would be able to graphically disseminate enough knowledge about its occurrence and inspire Americans to take action to end it. In the process of testifying, these people created a vernacular history of the violence they endured and witnessed, as well as the identities that grew from the experience of violence. This history fostered an oppositional consciousness to racial violence that inspired African Americans to form and support campaigns to end violence. The resulting crusades against racial violence became one of the political training grounds for the civil rights movement.

East Tennessee State University (ETSU), located in Johnson City, was founded in 1911 as East Tennessee State Normal School to provide teachers for the state's public schools. The institution originally offered two courses of study: a four-year high school program and a two-year normal school curriculum, which initially enrolled 29 students. Today

ETSU serves more than 14,000 students and offers over 100 undergraduate programs, 75 master's programs, and a dozen areas of doctoral study. The university is organized into 11 colleges and schools. Approximately 700 full-time faculty members, 80 percent of whom hold doctorates, serve the institution's students. Indicative of embracing its Appalachian heritage and location, the university boasts several unique programs, which include bluegrass studies and storytelling. While ETSU offers all the opportunities and resources of any large university, it also has many advantages typically found only in small colleges.

A national map of legalized gambling from 1963 would show one state, Nevada, with casino gambling and no states with lotteries. Today's map shows eleven commercial casino states, most of them along the Mississippi River, forty-two states with state-owned lotteries, and racetrack betting, slot-machine parlors, charitable bingo, and Native American gambling halls flourishing throughout the nation. For the past twenty years, the South has wrestled with gambling issues. In *How the South Joined the Gambling Nation*, Michael Nelson and John Lyman Mason examine how modern southern state governments have decided whether to adopt or prohibit casinos and lotteries. Nelson and Mason point out that although the South participated fully in past gambling eras, it is the last region to join the modern movement embracing legalized gambling. Despite the prevalence of wistful, romantic images of gambling on southern riverboats, the politically and religiously conservative ideology of the modern South makes it difficult for states to toss their chips into the pot. The authors tell the story of the arrival or rejection of legalized gambling in seven southern states -- Mississippi, Louisiana, Tennessee, South Carolina, Georgia, Arkansas, and Alabama. The authors suggest that some states chose to legalize gambling based on the examples of other nearby states, as

when Mississippi casinos spurred casino legalization in Louisiana and the Georgia lottery inspired lottery campaigns in neighboring South Carolina, Alabama, and Tennessee. Also important was the influence of Democratic policy entrepreneurs, such as Zell Miller in Georgia, Don Siegelman in Alabama, and Edwin Edwards in Louisiana, who wanted to sell the idea of gambling in order to sell themselves to voters. At the same time, each state had its own idiosyncrasies, such as certain provisions of their state constitutions weighing heavily as a factor. Nelson and Mason show that the story of gambling's spread in the South exemplifies the process of state policy innovation. In exploring how southern states have weighed the moral and economic risk of legalizing gambling, especially the political controversies that surround these discussions, Nelson and Mason employ a suspenseful, fast-paced narrative that echoes the oftentimes hurried decisions made by state legislators. Although each of these seven states fought a unique battle over gambling, taken together, these case studies help tell the larger story of how the South -- sometimes reluctantly, sometimes enthusiastically -- decided to join the gambling nation.

This book is a biography of Dr. Robert S. Sanders, who was born in middle Tennessee in 1927. He was educated and trained at Vanderbilt University Medical School. He became a well known pediatrician and was the director for 25 years of the Rutherford County Health Department

in Murfreesboro, Tennessee. Sanders was the catalyst for the "grassroots" lobbying that resulted in Tennessee's being the first state in the nation with a child restraint law (Child Passenger Protection Act) in 1977, a landmark event.

Civil War Flags of Tennessee provides information on all known Confederate and Union flags of the state and showcases the Civil War flag collection of the

Tennessee State Museum. This volume is organized into three parts. Part 1 includes interpretive essays by scholars such as Greg Biggs, Robert B. Bradley, Howard Michael Madaus, and Fonda Ghiardi Thomsen that address how flags were used in the Civil War, their general history, their makers, and preservation issues, among other themes. Part 2 is a catalogue of Tennessee Confederate flags. Part 3 is a catalogue of Tennessee Union flags. The catalogues present a collection of some 200 identified, extant Civil War flags and another 300 flags that are known through secondary and archival sources, all of which are exhaustively documented. Appendices follow the two catalogue sections and include detailed information on several Confederate and Union flags associated with the states of Mississippi, North Carolina, and Indiana that are also contained in the Tennessee State Museum collection. Complete with nearly 300 color illustrations and meticulous notes on textiles and preservation efforts, this volume is much more than an encyclopedic log of Tennessee-related Civil War flags. Stephen Cox and his team also weave the history behind the flags throughout the catalogues, including the stories of the women who stitched them, the regiments that bore them, and the soldiers and bearers who served under them and carried them. *Civil War Flags of Tennessee* is an eloquent hybrid between guidebook and chronicle, and the scholar, the Civil War enthusiast, and the general reader

will all enjoy what can be found in its pages. Unprecedented in its variety and depth, Cox's work fills an important historiographical void within the greater context of the American Civil War. This text demonstrates the importance of Tennessee state heritage and the value of public history, reminding readers that each generation has the honor and responsibility of learning from and preserving the history that has shaped us all--and in doing so, honoring the lives of the soldiers and civilians who sacrificed and persevered.

Born during the turbulent years of the 1960s, multicultural education has attempted to help students acquire a more sophisticated understanding of the pluralistic populations of the United States. This reference book is a convenient guide to multicultural education initiatives in the 50 states. The volume contains alphabetical entries for each state. Because multicultural education is largely a response to the ethnic composition of a particular state, each entry begins with a brief history of the state, which gives special attention to the experiences of various racial and ethnic groups. The second part of each entry summarizes the educational system of the state, while the third analyzes the state's multicultural education efforts. Each entry closes with bibliographic information, and the volume concludes with a selected, general bibliography.

Children's health has clearly improved over the past several decades. Significant and positive gains have been made in lowering rates of infant mortality and morbidity from infectious diseases and accidental causes, improved access to health care, and reduction in the effects of environmental contaminants such as lead. Yet major questions still remain about how to assess the status of children's health, what factors should be monitored, and the appropriate measurement tools that should be used. *Children's Health, the Nation's Wealth: Assessing and Improving Child Health* provides a detailed examination of the information about children's health that is needed to help policy

makers and program providers at the federal, state, and local levels. In order to improve children's health—and, thus, the health of future generations—it is critical to have data that can be used to assess both current conditions and possible future threats to children's health. This compelling book describes what is known about the health of children and what is needed to expand the knowledge. By strategically improving the health of children, we ensure healthier future generations to come.
