The Journey Of Modern Theology From Reconstruction To Deconstruction

This study, based on the Bampton Lectures delivered in the University of Oxford in 1992, examines what is often called the crisis of modernity, with reference not only to modernity but to modern culture in general. Problems of social, theological, and philosophical thought are traced back beyond the Enlightenment to the very roots of Western Christian theology. A response to these problems is essayed by constructively developing conceptual

Stanley J. Grenz and Roger E. Olson show what theology is, what tools theologians use, why every believer (advanced degrees or not) is a theologian and how the theological enterprise can be productive and satisfying.

Seasoned teachers introduce the Catholic social tradition with distinctive attention to the Bible, liturgy, and the thought of Augustine and Aquinas.

how Christians have reconciled their myth-filled religious beliefs within a world secularized by Enlightenment criticism and science. To understand how religion keeps its place in Christians' lives, Dorrien writes, we must explore how modern theologians have answered the question of myth in today's Christianity. Dorrien's narrative walks readers through modern theology - stopping with each of the major thinkers along the way to see how they dealt with the issue of modern Christian mythology. Ultimately he offers his own "new neo-

contemporary practical theology. It represents a reflection on the very practice of the discipline itself, its foundational questions and epistemological claims. Each chapter examines different aspects of the research process: starting with experience and practice, aspects of research design and epistemology, communities of learning, the influence of theological norms and tradition on the practice of research, and ethical considerations about what constitutes 'the good' in advanced research. The uniqueness of this book rests in its

authoritative overview of current practical theological research across a range of traditions and approaches, combined with a comprehensive introduction to research methodology. It offers worked examples from the authors, their colleagues and research students that serve to illustrate key ideas and approaches in practical theological research. The four authors are all internationally-leading scholars and rank amongst the most influential figures in practical theology of their generation. The book promises to be of interest to students,

The Idealistic Logic of Modern Theology

Daniel Migliore's Faith Seeking Understanding has been a standard introduction to Christian theology for more than a decade. The book's presentation of traditional doctrine in freshly contemporary ways, its concern to hear and critically engage new voices in theology, and its creative and accessible style have kept it one of the most stimulating, balanced, and readable guides to theology available. This second edition of Faith Seeking Understanding

File Type PDF The Journey Of Modern Theology From Reconstruction To Deconstruction

features improvements from cover to cover. Besides updating and expanding the entire text of the book, Migliore has added two completely new chapters. The first, "Confessing Jesus Christ in Context," explores the unique contributions to Christian theology made by recent theologians working in the African American, Asian American, Latin American, Hispanic, feminist, womanist, and mujerista traditions. The second new chapter, "The Finality of Jesus Christ and Religious Pluralism," addresses the growing interest in the relationship of Christianity to other religions and their adherents. Migliore's three delightful theological dialogues are followed by a new appendix, an extensive glossary of theological terms, making the book even more useful to students seeking to understand the history, themes, and challenges of Christian belief. How we come to our conclusions about ethical issues matters as

File Type PDF The Journey Of Modern Theology From Reconstruction To Deconstruction

much as the specific policies or practices we commend. This book argues that four key doctrines form a theological perspective for environmental ethics. They are the key ideas upon which people build their ethics of the environment. By looking at the doctrines of revelation, creation, anthropology, and eschatology, we can find points of contact to work together more effectively for the common good and have more meaningful debates when our positions differ. This book uses examples from four different theological positions—ecotheology, theological liberalism, fundamentalism, and evangelicalism—to show that a creation-positive ethic is possible from all of these positions, and it explores why people who stand within various theological streams may engage in environmental issues in diverse ways.

This book argues that a primary purpose of theological discourses is

File Type PDF The Journey Of Modern Theology From Reconstruction To Deconstruction

to construct piety or spirituality. If this is the case, theologians need to constantly inquire into the kind of piety or spirituality which their work may construct. Drawing from some important moments in the development of Christian theology, such as the development of the Christian doctrine of God in the early church, the role of material things in the Christianity of medieval Europe, some elements of contemporary postliberal theology, and the theology of inculturation in Africa, the book argues that theological discourses that appear to be orthodox and innocuous may actually construct forms of piety that may diminish human flourishing. The book therefore calls for an ethics of theology intended to ensure that the theologies we construct help in developing a piety that is conducive to human flourishing in the modern world, especially for Africans, who have suffered and continue to suffer unspeakable

dehumanization. The book proposes that a theology that may contribute to the flourishing of Africans in the modern world is one that constructs an interdisciplinary spirituality that takes both the spiritual and the scientific seriously.

This book introduces a new "multilateral" methodology for the contemporary study of theology. It bases this methodology on the idea that there are too many materials contributing as sources for theologizing to sustain the "one method fits all" approach found in many systematic theologies within Christianity. What is needed instead is something that reflects the various and varied natures, purposes, and tasks of theologians' theologizing for their respective contexts. Engaging materials from a range of Christian traditions, including Evangelicalism, the Catholic Magisterium, and a limited range of pan-Orthodox resources, the book analyzes and assesses

File Type PDF The Journey Of Modern Theology From Reconstruction To Deconstruction

major factors that have shaped different streams of theology. Addressing doctrinal development, scripture and revelation, historical tradition and creeds, philosophy and truth, sciences and interdisciplinarity, experience, religious pluralism, and culture, it demonstrates how these various streams can form a multilateral whole. The book concludes by examining the centers and peripherals of methodologies in theologization for a spectrum of theological traditions/streams, both across and beyond Christianity. By offering an approach that keeps in step with the increasingly interconnected and pluralistic world in which we live, this book provides a vital resource for any scholar of Christian theology, constructive theology, contextual theologies, and systematic theology, as well as religious studies.

In this seminal work, pioneering theologian Ernst Troeltsch raises the question, how can we pass beyond the diversity with which history presents us to norms for our faith and for our judgments about life? He trenchantly probes the issue of how one religion--when viewed historically in the context of other world religions--can be universally and absolutely true. The historical movement known as Pietism emphasized the response of faith and inward transformation as crucial aspects of conversion to Christ. Unfortunately, Pietism today is often equated with a “holier-than-thou” spiritual attitude, religious legalism, or withdrawal from involvement in society. In this book Roger Olson and Christian Collins Winn argue that classical, historical Pietism is an influential stream in evangelical

Examining religion in the context of modern atheism, James Mackey argues that modern Christian apologists have neglected the positive and humanistic visions of Hegel and his followers while trying to combat 20th-century materialism with ineffectual arguments: "proofs" of God's existence, historical evidence for miracles, and doctrines imposed by authorities. Mackey explores a more promising direction in modern theology by insisting on a closer attention to those philosophers who promote the natural

The book examines the contribution that Desmond's metaphysics makes to contemporary theological discourse and to the renewal of metaphysics. A central issue for the contributors is the renewal of metaphysics within the post-metaphysical, or anti-metaphysical, context of late modernity. This volume not only capably demonstrates the viability of the

American environmentalism historically has been associated with the interests of white elites. Yet religious leaders in the twenty-first century have helped instill concern about the earth among groups diverse in religion, race, ethnicity, and class. How did that happen and what are the implications? Building on scholarship that provides theological and ethical resources to support the “greening” of religion, *God and the Green Divide* examines religious environmentalism as it actually happens in the daily lives of urban Americans.

Baugh demonstrates how complex dynamics related to race, ethnicity, and class factor into decisions to “go green.” By carefully examining negotiations of racial and ethnic identities as central to the history of religious environmentalism, this work complicates assumptions that religious environmentalism is a direct expression of theology, ethics, or religious beliefs.

Offering both an excellent review of recent trends in Christian theology and a powerful analysis of these trends, Mattes points readers to the various ways in which the doctrine of justification has been applied today. Despite the greatness of their thought, Jungel, Pannenberg, and Moltmann each accommodate the doctrine of justification to goals aligned with secular modernity. Both Jenson and Bayer, on the other hand, construe the doctrine of justification in a nonaccommodating way, thus challenging the secularity of the modern academy. In the end, Mattes argues that Bayer's position is to be
