NEW ADULTÂ B2+ WORKBOOK W/ KEY BRE

On Screen B2

Children Solving Problems

This work surveys research from a range of perspectives in order to examine how children develop problem-solving skills. The author suggests that successful problem-solving is a social process, and that sharing problem-solving - with adults and other children - is vital to a child's development.

A vital guide to the frontlines of our fight against climate change and the scientific and technological innovations that will revolutionize the world. The United States' accelerated plans to combat the existential threat of climate change finally give reason to hope. In Our Livable World, research specialist and author Marc Schaus explores the incredible new green

innovations in science and engineering that can allow us to avoid the worst repercussions of global warming as we work to usher in a sustainable, livable world. To beat a challenge the size of climate change, our solutions will have to be ambitious: solar thermal cells capable of storing energy long after the sun goes down, “smart highways” designed to charge your vehicle as you drive, indoor vertical farms automated to maximize crop growth with no pesticides, bioluminescent vines ready to one day replace our streetlights, jet fuel created from landfill trash—and next-generation carbon capture techniques to remove the emissions we have already released over the past several decades. Far from the geoengineering schemes of cli-fi action thrillers, real solutions are being developed, right this moment. Our Livable World features interviews with the innovators, real talk on the revolutionary technology, and a clear picture of a cleaner planet in the future. “An important book that shows the dawn of a new kind of environmental movement—an age where we invest in deeply creative and fascinating technical solutions that work in harmony with the Earth. Marc Schaus lays out the exciting future of environmental innovation before us.” —Katie Patrick, author of *How to Save the World*

Cambridge Academic English B2 Upper Intermediate Class Audio CD and DVD Pack

Face2face is the flexible, easy-to-teach General English course that helps adults and young adults to speak and listen with confidence. face2face is informed by Cambridge English Corpus and its vocabulary syllabus has been mapped to the English Vocabulary Profile, meaning students learn the language they really need at each CEFR level. The course improves students' listening skills by drawing their attention to the elements of spoken English that are difficult to understand. The free DVD-ROM in the Student's Book includes consolidation activities and electronic portfolio for learners to track their progress with customisable tests and grammar and vocabulary reference sections.

The Business 2.0 continues to offer Business English students the confidence, language and fundamentals skills they need to succeed in the competitive international business environment. The eWorkbook includes extra language practice, tests, wordlists and downloadable audio/video for on-the-go learning. It makes the most of new media.

Creating the Clean Earth of Tomorrow

matura extra practice : [student's book]

This course translates the theory of task-based learning into a practical and user-friendly coursebook, recognizing that the performance of regular spoken and written tasks is crucial to successful language acquisition. It combines elements of the task-based approach with a strong emphasis on vocabulary, alongside a comprehensive grammar and skills syllabus.

Life is an exciting new six-level adult series that turns learning English into an exploration of the world we live in by drawing on National Geographic content such as images, articles and videos. Student's Book contains: engaging tasks with fascinating NG content; review at end of each unit; grammar reference with practice activities. CEF: A1-C1.

Amazon Book of the Year "Floodpath attempts to rescue the disaster from obscurity . . . The author captures many heartbreaking stories of survivors . . . The effect is powerful." --The Wall Street Journal A visionary and controversial search for water made Los Angeles possible. But the failure of the St. Francis Dam remains an urgent lesson about our human limits, all but forgotten today. Just before midnight on March 12, 1928, the St. Francis Dam, a twenty-story-high concrete structure just fifty miles north of Los Angeles, suddenly collapsed, releasing a devastating flood that roared fifty-four miles to the Pacific Ocean, destroying everything in its path. It was a horrific catastrophe, yet one which today is virtually forgotten. With research gathered over more than two decades, award-winning writer and filmmaker Jon Wilkman revisits the deluge that claimed nearly five hundred lives. A key figure is William Mulholland, the self-taught engineer who created an unprecedented water system, allowing Los Angeles to become America's second largest city, and who was also responsible for the design and construction of the St. Francis Dam. Driven by eyewitness accounts and combining urban history with a life-and-death drama and a technological detective story, Floodpath grippingly reanimates the reality behind L.A. noir fictions like the classic film Chinatown. In an era of climate change, increasing demand on water resources, and a neglected American infrastructure, the tragedy of the St. Francis Dam has never been more relevant.

Grammarway is a series of four grammar books in full colour. Designed for learners of English at beginner to intermediate level, they systematically practise and revise English grammar structures. The series can be used to supplement any main coursebook at secondary level and is suitable both for self-study and classroom use.

Perspectives Advanced

No place is perfectly safe, but some places are more dangerous than others. Whether we live on a floodplain or in "Tornado Alley," near a nuclear facility or in a neighborhood poorly lit at night, we all co-exist uneasily with natural and man-made hazards. As Mark Monmonier shows in this entertaining and immensely informative book, maps can tell us a lot about where we can anticipate certain hazards, but they can also be dangerously misleading. California, for example, takes earthquakes seriously, with a comprehensive program of seismic mapping, whereas Washington has been comparatively lax about earthquakes in Puget Sound. But as the Northridge earthquake in January 1994 demonstrated all too clearly to Californians, even reliable seismic-hazard maps can deceive anyone who misinterprets "known fault-lines"

as the only places vulnerable to earthquakes. Important as it is to predict and prepare for catastrophic natural hazards, more subtle and persistent phenomena such as pollution and crime also pose serious dangers that we have to cope with on a daily basis. Hazard-zone maps highlight these more insidious hazards and raise awareness about them among planners, local officials, and the public. With the help of many maps illustrating examples from all corners of the United States, Monmonier demonstrates how hazard mapping reflects not just scientific understanding of hazards but also perceptions of risk and how risk can be reduced. Whether you live on a faultline or a coastline, near a toxic waste dump or an EMF-generating power line, you ignore this book's plain-language advice on geographic hazards and how to avoid them at your own peril. "No one should buy a home, rent an apartment, or even drink the local water without having read this fascinating cartographic alert on the dangers that lurk in our everyday lives. . . . Who has not asked where it is safe to live? Cartographies of Danger provides the answer."—H. J. de Blij, NBC News "Even if you're not interested in maps, you're almost certainly interested in hazards. And this book is one of the best places I've seen to learn about them in a highly entertaining and informative fashion."—John Casti, New Scientist

Click On 1a - 4b is the split edition of the Click On series. In full colour, the series combines active English language learning with a variety of lively topics in themed modules. The split edition includes four key components of the Click On series: Video, DVD, Video Activity Book, Video Activity Book Key.
