

## Why Everyone Else Is A Hypocrite Evolution And The Modular Mind Robert Kurzban

"A warm and charming family story...one can imagine this this story ends where All-of-a-Kind Family begins."--"School Library Journal"

*This original children's story about divorce focuses on how what seems to be a bad situation can give way to a potentially bright future. Instead of focusing on the negative fracturing of the family, it discusses the hopeful possibilities that follow.*

*That elusive Holy Grail of modern physics, A Theory of Everything (ToE), would explain the universe in a single set of equations. Albert Einstein and Stephen Hawking tackled the problem during their lifetimes and the quest continues today in laboratories around the world. Leaving string theory, galaxy clusters, and supersymmetry to the Quantum Computer and Hadron Collider crowd, Pedersen has taken up the rest—that is, A Theory of Everything Else (ToEE), based on her own groundbreaking experiences as a dog walker, camp counselor, and Bingo caller. Pedersen's essays are a series of colorful helium balloons that entertain as well as affirm and uplift. Why, she ponders in one essay, are thousands perishing as a result of assault weapons, carbon emissions, forest fires, pesticides, and processed foods—and yet how lawn darts were banned in the 1980s after two people died? In A Theory of Everything Else, Pedersen vividly demonstrates how life can appear to grind us down while it's actually polishing us up—and why everyone wants to live a long time but no one wants to grow old.*

*In a novel as riveting, irresistible, and heartbreaking as Into Thin Air, teen climbing prodigies Rose and Tate attempt to summit—and survive—Mount Everest. Rose Keller and Tate Russo have been climbing for years, training in harsh weather and traveling all over the world. The goal that kept them going? Summiting Mount Everest, the highest point on earth. Accompanied by Tate's dad, the two will finally make the ultimate climb at the end of their senior year. But neither Rose nor Tate are fully in the game—not only is there a simmering romance between them, but Rose can't get her mind off her mother's illness, while Tate constantly fails to live up to his ambitious father's standards. Everyone on their expedition has something to prove, it seems. And not everyone is making the best decisions while short on oxygen and exhausted, body and mind. The farther up the mountain they go, the more their climbing plans unravel and the more isolated each team member becomes. Rose and Tate will have to dig deep within themselves to determine what—or who—they value above all else.*

The brain is a fearsomely complex information-processing environment--one that often eludes our ability to understand it. At any given time, the brain is collecting, filtering, and analyzing information and, in response, performing countless intricate processes, some of which are automatic, some voluntary, some conscious, and some unconscious.Cognitive neuroscience is one of the ways we have to understand the workings of our minds. It's the study of the brain biology behind our mental functions: a collection of methods--like brain scanning and computational modeling--combined with a way of looking at psychological phenomena and discovering where, why, and how the brain makes them happen.Want to know more? Mind Hacks is a collection of probes into the moment-by-moment workings of the brain. Using cognitive neuroscience, these experiments, tricks, and tips related to vision, motor skills, attention, cognition, subliminal perception, and more throw light on how the human brain works. Each hack examines specific operations of the brain. By seeing how the brain responds, we pick up clues about the architecture and design of the brain, learning a little bit more about how the brain is put together.Mind Hacks begins your exploration of the mind with a look inside the brain itself, using hacks such as "Transcranial Magnetic Stimulation: Turn On and Off Bits of the Brain" and "Tour the Cortex and the Four Lobes." Also among the 100 hacks in this book, you'll find: Release Eye Fixations for Faster Reactions See Movement When All is Still Feel the Presence and Loss of Attention Detect Sounds on the Margins of Certainty Mold Your Body Schema Test Your Handedness See a Person in Moving Lights Make Events Understandable as Cause-and-Effect Boost Memory by Using Context Understand Detail and the Limits of Attention Steven Johnson, author of "Mind Wide Open" writes in his foreword to the book, "These hacks amaze because they reveal the brain's hidden logic: they shed light on the cheats and shortcuts and latent assumptions our brains make about the world." If you want to know more about what's going on in your head, then Mind Hacks is the key--let yourself play with the interface between you and the world.

"I'm happy when everyone else is happy" And other lies I told myself. It all start's with a shift... a shift of knowing. Which has led me on my personal journey. The shift has meant that things in my life will never be the same again. The shift is usually, in my experience a painful one. One of great growth, understanding, learning and surrender- leading to the transformation of lasting change. The shift is calling us loudly now and we know that its time - we can't even think of a logical reason or choice anymore- it's just something we have to do: no other options are available. Embracing the shift is an act of stepping into your own power and your own light and helping others to do the same. Do you paint on your smile every morning, telling everyone that you're fine? When the reality is your an ridden with responsibilities and feeling miserable. Do you feel overwhelmed? Too much juggling, too many expectations? Feeling stuck and not sure how to make a change? Do you feel like you're muddling through life? Winging it with no control of what's going on? Your awareness is high, but clarity is low. You know it's time to make a change, but no idea how. You're waiting in anticipation for someone to give you permission to start living your life. This book is a combination of lessons I have learned, part memoir, part coaching questions, advice I have taken, and books and quotes that have helped me on my path. My hope, is by reading this book you may be able to short cut your journey back to your truest version of you!

Rus is a creature of habit. His mother abandoned him years earlier, leaving him with a shabby, un-permitted apartment and a debit card, from which he withdraws money everyday to purchase his Starbucks drink. When Rus is told by a government agency that his apartment is illegal and not fit for a human occupation, his simple life is turned upside down. For the first time, the unemployed, childless Rus learns about something truly awful: taxes. Realizing that the debit account is almost empty, Rus panics, and what is left is stolen by a smooth talking Russian submarine captain. As Rus capitulates to the demands of society and gets a job with the help of a controlling new girlfriend, a local postal worker surveys the other residents of the neighborhood from her apartment window. It is through her omniscient voice that we learn about "everyone else." A secretary struggles to make human connections, or even conversations, while her affair with her lawyer boss isn't helping matters. A delivery man wants to make a name for himself, but his ambitions don't seem to match his immigrant status. A lonely bachelor struggles to overcome his paranoia, and may finally triumph at a rally for the Queen. An old woman named Mrs. Blue compulsively steals hand creams to compensate for the cancellation of her favorite program. And there, inside Mrs. Blue's TV, the star of the soap opera begins to question her existence, as something clearly has gone awry. And at the center of it all is Rus - a sweet and inexperienced soul whose journey captures the daily isolation and confusion most of us feel. We are desperately pretending not to notice. Debut novelist Adriansee weaves together the intersecting lives of neighbors struggling to live in the modern condition, in a world of corporate sameness and forced interactions, perfectly capturing the struggle for individuality in the post-recession zeitgeist.

Everyone's favorite comic strip office worker returns in this dry, sarcastic, and utterly hilarious new Dilbert collection. No one is more accomplished at making the drudgery of office work into comedy than Dilbert creator Scott Adams, whose landmark comic strip starring the downtrodden engineer have entertained millions of readers for the past three decades. This collection includes hundreds of new strips, including the most recent Dilbert comics starring Dilbert, his pointy-haired boss, lazy colleague Wally, temperamental Alice, maniacal Catbert, and misguided intern Asok, among many others.

London's most eccentric dresser reveals his wildly imaginative and transgressive personal style. Daniel Lismore is known for elaborate and extravagant ensembles that brilliantly combine haute couture with charity-shop finds, yards of vintage fabrics and tartans, found objects, ribbons, feathers, chain mail, shells, ethnic jewelry, retro accessories, millinery and more in an expression of eccentric, creative energy. A prominent fixture of the London fashion and nightlife circuits, he is both tastemaker and friend to artists ranging from Stephen Fry and Debbie Harry to Boy George and Vivienne Westwood. For his first major publication, Lismore has selected thirty major ensembles rich with social, historical, and cultural themes from around the world. Lismore's unique sartorial point of view and wildly imaginative sculptural creations beckon fashion lovers to question and analyze their own personal identity and individual sense of style.

A Financial Times Best Book of the Year Shortlisted for the Lionel Gelber Prize There has always been some gap between rich and poor in this country, but recently what it means to be rich has changed dramatically. Forget the 1 percent—Plutocrats proves that it is the wealthiest 0.1 percent who are outpacing the rest of us at breakneck speed. Most of these new fortunes are not inherited, amassed instead by perceptive businesspeople who see themselves as deserving victors in a cutthroat international competition. With empathy and intelligence, Plutocrats reveals the consequences of concentrating the world's wealth into fewer and fewer hands. Propelled by fascinating original interviews with the plutocrats themselves, Plutocrats is a tour de force of social and economic history, the definitive examination of inequality in our time.

A Genealogy of Puberty Science explores the modern invention of puberty as a scientific object. Drawing on Foucault's genealogical analytic, Pinto and Macleod trace the birth of puberty science in the early 1800s and follow its expansion and shifting discursive frameworks over the course of two centuries. Offering a critical inquiry into the epistemological and political roots of our present pubertal complex, this book breaks the almost complete silence concerning puberty in critical theories and research about childhood and adolescence. Most strikingly, the book highlights the failure ?of ongoing medical debates on early puberty to address young people's sexual and reproductive embodiment and citizenships. A Genealogy of Puberty Science will be of great interest to academics, researchers and postgraduate students in the fields of child and adolescent ?health research, critical psychology, developmental psychology, health psychology, ?feminist and gender studies, ?medical history, science and technology studies, and sexualities and reproduction studies.

Dream Hoarders sparked a national conversation on the dangerous separation between the upper middle class and everyone else. Now in paperback and newly updated for the age of Trump, Brookings Institution senior fellow Richard Reeves is continuing to challenge the class system in America. In America, everyone knows that the top 1 percent are the villains. The rest of us, the 99 percent—we are the good guys. Not so, argues Reeves. The real class divide is not between the upper class and the upper middle class: it is between the upper middle class and everyone else. The separation of the upper middle class from everyone else is both economic and social, and the practice of “opportunity hoarding”—gaining exclusive access to scarce resources—is especially prevalent among parents who want to perpetuate privilege to the benefit of their children. While many families believe this is just good parenting, it is actually hurting others by reducing their chances of securing these opportunities. There is a glass floor created for each affluent child helped by his or her wealthy, stable family. That glass floor is a glass ceiling for another child. Throughout Dream Hoarders, Reeves explores the creation and perpetuation of opportunity hoarding, and what should be done to stop it, including controversial solutions such as ending legacy admissions to school. He offers specific steps toward reducing inequality and asks the upper middle class to pay for it. Convinced of their merit, members of the upper middle class believes they are entitled to those tax breaks and hoarded opportunities. After all, they aren't the 1 percent. The national obsession with the super rich allows the upper middle class to convince themselves that they are just like the rest of America. In Dream Hoarders, Reeves argues that in many ways, they are worse, and that changes in policy and social conscience are the only way to fix the broken system.

Transform Your Life with the Power of Authenticity

Everybody (Else) Is Perfect

*The old saying goes, "To the man with a hammer, everything looks like a nail." But anyone who has done any kind of project knows a hammer often isn't enough. The more tools you have at your disposal, the more likely you'll use the right tool for the job - and get it done right. The same is true when it comes to your thinking. The quality of your outcomes depends on the mental models in your head. And most people are going through life with little more than a hammer. Until now. The Great Mental Models: General Thinking Concepts is the first book in The Great Mental Models series designed to upgrade your thinking with the best, most useful and powerful tools so you always have the right one on hand. This volume details nine of the most versatile, all-purpose mental models you can use right away to improve your decision making, productivity, and how clearly you see the world. You will discover what forces govern the universe and how to focus your efforts so you can harness them to your advantage, rather than fight with them or worse yet- ignore them. Upgrade your mental toolbox and get the first volume today. AUTHOR BIOGRAPHY Farnam Street (FS) is one of the world's fastest growing websites, dedicated to helping our readers master the best of what other people have already figured out. We curate, examine and explore the timeless ideas and mental models that history's brightest minds have used to live lives of purpose. Our readers include students, teachers, CEOs, coaches, athletes, artists, leaders, followers, politicians and more. They're not defined by gender, age, income, or politics but rather by a shared passion for avoiding problems, making better decisions, and lifelong learning. AUTHOR HOME Ottawa, Ontario, Canada*

*Why you have the right to resist unjust government For centuries, almost everyone has believed that we must allow the government and its representatives to act without interference, no matter how they behave. We may complain, protest, sue, or vote officials out, but we can't fight back. But in When All Else Fails, Jason Brennan argues that we have every right to react with acts of "uncivil disobedience" when governments violate our rights. We may resist arrest for violation of unjust laws. We may disobey orders, sabotage government property, or reveal classified information. We may deceive ignorant, irrational, or malicious voters. We may even use force to defend ourselves or others. The result is a provocative challenge to long-held beliefs about how citizens may respond when government officials act unjustly or abuse their power.*

The beloved, bestselling classic that became the movie, A CHRISTMAS STORY -- humorous and nostalgic Americana, reissued in a strikingly designed paperback edition. Before Garrison Keillor and Spalding Gray there was Jean Shepherd: a master monologist and writer who spun the materials of his all-American childhood into immensely resonant--and utterly hilarious--works of comic art. In God We Trust: All Others Pay Cash represents one of the peaks of his achievement, a compound of irony, affection, and perfect detail that speaks across generations. In God We Trust, Shepherd's wily witty reunion with his Indiana hometown, disproves the adage "You can never go back." Bending the ear of Flick, his childhood-buddy-turned-bartender, Shepherd recalls passionately his genuine Red Ryder BB gun, confesses adolescent failure in the arms of Junie Jo Prewitt, and relives a story of man against fish that not even Hemingway could rival. From pop art to the World's Fair, Shepherd's subjects speak with a universal irony and are deeply and unabashedly grounded in American Midwestern life, together rendering a wonderfully nostalgic impression of a more innocent era when life was good, fun was clean, and station wagons roamed the earth. A comic genius who bridged the gap between James Thurber and David Sedaris, Shepherd may have accomplished for Holden, Indiana, what Mark Twain did for Hannibal, Missouri.

Guided by a friendly page-hopping cat, Everyone tackles the topics of emotions and experiences in a sympathetic manner, encouraging empathy with others.

A totalitarian regime has ordered all books to be destroyed, but one of the book burners suddenly realizes their merit.

A hilariously charming novel about a heartbroken man trying to redeem himself by championing forgotten books Fleeing heartbreak, an unnamed author goes to an unnamed city to give a series of lectures at an unnamed university about forgotten books ... only to find himself involved in a mystery when the professor who invited him is no where to be found, and no one seems quite sure why he's there.... So begins this Wes Anderson-like novel hilariously spoofing modernist literature even as it tells a stirring -- and eerily suspenseful -- story about someone desperate to prove the redeeming power of reading -- and writing -- books. And as the narrator gives his lectures, attends vague functions where no one speaks English, never quite meets his host professor and wonders the city looking for the grave of his literary hero, the reader begins to suspect this man's relentless faith in literature may be the only thing getting him through the mystery enveloping him.

Fahrenheit 451

Secrets of Silicon Valley

We're all hypocrites. Why? Hypocrisy is the natural state of the human mind. Robert Kurzban shows us that the key to understanding our behavioral inconsistencies lies in understanding the mind's design. The human mind consists of many specialized units designed by the process of evolution by natural selection. While these modules sometimes work together seamlessly, they don't always, resulting in impossibly contradictory beliefs, vacillations between patience and impulsiveness, violations of our supposed moral principles, and overinflated views of ourselves. This modular, evolutionary psychological view of the mind undermines deeply held intuitions about ourselves, as well as a range of scientific theories that require a "self" with consistent beliefs and preferences. Modularity suggests that there is no "I." Instead, each of us is a contentious "we"--a collection of discrete but interacting systems whose constant conflicts shape our interactions with one another and our experience of the world. In clear language, full of wit and rich in examples, Kurzban explains the roots and implications of our inconsistent minds, and why it is perfectly natural to believe that everyone else is a hypocrite.

Now in paperback, the national bestselling riches-to-rags true story of an advertising executive who had it all, then lost it all—and was finally redeemed by his new job, and his twenty-eight-year-old boss, at Starbucks. In his fifties, Michael Gates Gill had it all: a mansion in the suburbs, a wife and loving children, a six-figure salary, and an Ivy League education. But in a few short years, he lost his job, got divorced, and was diagnosed with a brain tumor. With no money or health insurance, he was forced to get a job at Starbucks.

Having gone from power lunches to scrubbing toilets, from being served to serving, Michael was a true fish out of water. But fate brings an unexpected teacher into his life who opens his eyes to what living well really looks like. The two seem to have nothing in common:

She is a young African American, the daughter of a drug addict; he is used to being the boss but reports to her now. For the first time in his life he experiences being a member of a minority trying hard to survive in a challenging new job. He learns the value of hard work

and humility, as well as what it truly means to respect another person. Behind the scenes at one of America's most intriguing businesses, an inspiring friendship is born, a family begins to heal, and, thanks to his unlikely mentor, Michael Gill at last experiences a sense of self-worth and happiness he has never known before. Watch a QuickTime trailer for this book.

A biography of the American playwright portrays him as a troubled artist who coped with his insecurities through the daily discipline of writing

Brought together by a mutual fascination with pigeons, Louisa, a young chambermaid at the Hotel New Yorker, forms an unlikely friendship with the hotel's most famous and unusual resident, eccentric and pioneering inventor Nikola Tesla, during his final days. Reprint.

Why I'm Right ... and Everyone Else is Wrong

Before Anyone Else

Daniel Lismore

While the global economy languishes, one place just keeps growing despite failing banks, uncertain markets, and high unemployment: Silicon Valley. In the last two years, more than 100 incubators have popped up there, and the number of angel investors has skyrocketed. Today, 40 percent of all venture capital investments in the United States come from Silicon Valley firms, compared to 10 percent from New York. In *Secrets of Silicon Valley*, entrepreneur and media commentator Deborah Perry Piscione takes us inside this vibrant ecosystem where meritocracy rules the day. She explores Silicon Valley's exceptionally risk-tolerant culture, and why it thrives despite the many laws that make California one of the worst states in the union for business. Drawing on interviews with investors, entrepreneurs, and community leaders, as well as a host of case studies from Google to Paypal, Piscione argues that Silicon Valley's unique culture is the best hope for the future of American prosperity and the global business community and offers lessons from the Valley to inspire reform in other communities and industries, from Washington, DC to Wall Street.

This is a collection of the best bits from the popular Labour blog. Tom Harris uses his And Another Thing... blog as an outlet for opinions, jokes, musings and whimsy about a range of subjects including - but not only - politics. If you believe that politicians take themselves too seriously, you might enjoy it. If you think they should take themselves very seriously indeed, or shouldn't have any interests outside politics, I would avoid it, frankly. Try John Redwood. Tom has been a Labour MP since 2001, and was a minister at the Department for Transport from September 2006 until October 2008. He has a number of obsessive interests, including Doctor Who, science fiction in general, the music of Genesis, The X-Factor and any other old rubbish that comes into my head. Oh, and politics.

Many people have silently asked themselves why can't I drink like everyone else? They wonder why sometimes it feels like alcohol has a pull over them, that they don't understand, and don't like to talk about. They are frustrated that other people can control how much they drink without any problem, when their efforts are often hit or miss. Rachel Hart has spent years trying to answer these questions for herself and untangle this mystery. Deep down, she was afraid that her drinking was always going to be a problem, and grew more and more frustrated of the repercussions. As the years mounted, she worried that not being able to rein herself in meant something was really wrong with her. There is a solution—and it doesn't require anyone to wear a label for the rest of their life or admit to being powerless. In fact, the tools outlined inside will reveal just how much power there is within each and every person struggling with this issue.

Before Anyone Else follows Bailey who, for being an interior designers for upscale restaurant, is not nearly as good at designing her own life. Follow her across New York's glamorous culinary landscape as she experiences a shocking betrayal that changes her life forever.

Praise for *Be Yourself, Everyone Else is Already Taken* "Mike's book is a wonderful expression of authenticity in action—clear, honest, instructive, and a passionate call to be your true Divine Self." —Cheryl Richardson, *New York Times* best-selling author, *Take Time for Your Life* "Mike Robbins provides a clear guide for intelligently and compassionately coming face-to-face with yourself and loving the person you meet. His five principles of authenticity teach us how to embrace and celebrate all aspects of who we are and what it means to be a spiritual being having a human incarnation." —Michael Bernard Beckwith, author, *Spiritual Liberation* "Be Yourself, Everyone Else is Already Taken is an empowering and refreshing book about how to be successful, real, and fulfilled in life. I highly recommend it."

—Gay Hendricks, *New York Times* best-selling author, *Five Wishes* "Mike Robbins has written a powerful, down-to-earth, and insightful book on one of the most important aspects of happiness and fulfillment in life—authenticity. *Be Yourself, Everyone Else Is Already Taken* will give you tools and techniques to enhance your life and relationships in a profound way." —Marci Shimoff, *New York Times* best-selling author, *Happy for No Reason* "Be Yourself, Everyone Else Is Already Taken reminds us that God created each one of us for a unique purpose."We live in a world where the lines between fake and real have blurred. This powerful book teaches you how to access and express the realness you crave in your work, your relationships, and yourself." —Jon Gordon, author, *The Energy Bus*

World famous competitive skydiver and coach Dan Brodsky-Chenfeld presents proven tools and techniques for success and explains how they can be used in everyday life. Dan survived a plane crash from which sixteen of the twenty-two people on board were killed. He was left critically injured and woke up from a six-week-long coma with a broken neck, broken skull, severe head trauma, a collapsed lung, and other serious internal injuries. Against all odds, Dan recovered and went on to become one of the greatest competitive skydiver in the world. With the love and support of friends and family, Dan was able not only to resurrect his life but return to skydiving to achieve greater heights than he could have ever imagined. His techniques and methods for excelling are applicable to all people, no matter their goals. Dan uses his experiences to teach the lessons he's learned—as a competitor, coach, business owner, father, and husband—to help others achieve their dreams, overcome obstacles, and reach their peak performance.

A no-holds-barred, gonzo dive into the world of extreme behavior; from abstinence to ego, punishment to curiosity, obsession to reinvention, acclaimed journalist Jenny Valentish uncovers what drives those who push the limits of endurance. What do extreme eaters, MMA fighters, ultra-marathon runners, and BDSM practitioners have in common? What drives some people to push their bodies and minds to the brink, putting everything on the line to test the bounds of their capacity? When Jenny Valentish worked through her own addictions, she became fascinated by extremes in their myriad and unexpected manifestations. In the darkly funny, brash, and irresistible *Everything Harder Than Everyone Else*, Valentish immerses herself in the lives of sex workers, body builders, and dedicated fighters and finds that many of the people she encounters have overcome addictions and trauma to find release and community where the stakes are at their highest. Harnessing a journalistic approach that's equal parts brazenly curious and remarkably compassionate, Valentish finds herself neck-deep in her own investigation, embroiling herself in the world of competitive Muay Thai fighting and in the dark chambers of a BDSM dungeon. At every turn she stares unflinchingly into the darker corners of culture that polite society ignores and repudiates, asking readers and herself, how far are you willing to go?

Since 2001 William Germano's *Getting It Published* has helped thousands of scholars develop a compelling book proposal, find the right academic publisher, evaluate a contract, handle the review process, and, finally, emerge as published authors. But a lot has changed in the past seven years. With the publishing world both more competitive and mor...

A funny, sarcastic autobiography for those of us who find most people annoying. This book follows the life of Charles Hastings and his discovery of how he learned to hate everyone but love his dogs. "I didn't always hate everyone, it was an acquired taste." says Charles. "But I did always like dogs. From age five I just felt dogs were the coolest friends ever. Much more faithful and reliable than people. I knew it instinctively." "As for hating everyone, I actually started as a tabula rasa with the same chance as everyone else to like people. Maybe the genes were there to hate everyone, but they weren't developed yet. I can actually remember at age seven looking at my next-door neighbors and thinking 'I hate these people'".

Reveals how companies like GE and Burberry have broken the corporate mould, and introduces us to entrepreneurs like Leila Velez, who started a multi-million hair-care company from her kitchen sink in Rio.

Especially when there is a lot of political rhetoric in the air, those of us with strong political convictions are inclined to reflect on just why we hold certain views even as others who are basically like us hold very different ones. Social scientists and other thinkers struggle to explain it, but the puzzle remains—in part because they, too, disagree so much with one another. Whether the arena is politics, religion, business, scientific research, or education, individuals who operate in the same environment and experience the same conditions may have radically different interpretations of the facts and diametrically opposed convictions about how to react to them. When faced with a fundamental disagreement, we ask ourselves: Why are these folks so wrong? And how can they be so convinced that we are wrong? In this provocative monograph, Tibor Machan explores the principles of truth, reason, and ideology, with particular respect to the profound political, economic, and social crises gripping the world today. In so doing, he not only sheds light on the nature of "truth" but also suggests a framework for embracing differences to come up with creative solutions.

Why I Like Dogs and Hate Everyone Else

*From the former editor-in-chief of Nylon comes a provocative and intimate collection of personal and cultural essays featuring eye-opening explorations of hot button topics for modern women, including internet feminism, impossible beauty standards in social media, shifting ideals about sexuality, and much more. Gabrielle Korn starts her professional life with all the right credentials. Prestigious college degree? Check. A loving, accepting family? Check.*

*Instagram-worthy offices and a tight-knit group of friends? Check, check. Gabrielle's life seems to reach the crescendo of perfect when she gets named the youngest editor-in-chief in the history of one of fashion's most influential publication. Suddenly she's invited to the world's most epic parties, comped beautiful clothes and shoes from trendy designers, and asked to weigh in on everything from gay rights to lip gloss on one of the most influential digital platforms. But behind the scenes, things are far from perfect. In fact, just a few months before landing her dream job, Gabrielle's health and wellbeing are on the line, and her promotion to editor-in-chief becomes the ultimate test of strength. In this collection of inspirational and searing essays, Gabrielle reveals exactly what it's truly like in the fashion world, trying to find love as a young lesbian in New York City, battling with anorexia, and trying not to lose herself in a mirage of women's empowerment and Instagram perfection. Through deeply personal essays, Gabrielle recounts her struggles to reconcile her long-held insecurities about her body while coming out in the era of The L Word, where swoon-worthy lesbians are portrayed as skinny, fashion-perfect, and power-hungry. She takes us with her everywhere from New York Fashion Week to the doctor's office, revealing that the forces that try to keep women small are more pervasive than anyone wants to admit, especially in a world that's been newly branded as woke. From #MeToo to commercialized body positivity, Korn's biting, darkly funny analysis turns feminist commentary on its head. Both an in-your-face take on impossible beauty standards and entrenched media ideals and an inspiring call for personal authenticity, this powerful collection is ideal for fans of Roxane Gay and Rebecca Solnit.*

*Living in a "perfect" world without social ills, a boy approaches the time when he will receive a life assignment from the Elders, but his selection leads him to a mysterious man known as the Giver, who reveals the dark secrets behind the utopian facade.*
